Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Bank bjb's website is an established Indonesian corporate-banking platform presenting retail and business deposits, lending, payments, electronic banking, investment and insurance services, customer support, corporate information, investor relations, promotions, news, and exchange-rate information.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed malicious-reputation findings were observed. The site presents a coherent bank identity across its homepage and corporate content, with no sensitive login form, untrusted destination, wallet interaction, or credential-harvesting behavior detected. Normal interaction is therefore appropriate.

EVIDENCE

- Registration records show the domain was created on 2010-07-19 and is approximately 16.05 years old.
- The site has 574 archive snapshots spanning 2010–2026, covering 17 tracked years.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist finding.

Regulatory Verification Notes

The homepage and corporate sections identify Bank bjb's retail and business banking model, including deposits, loans, payment services, electronic banking, investment and insurance offerings, investor relations, customer contacts, and regulatory disclosures. The supplied evidence does not identify a specific license number or regulator-issued authorization reference, so licensing should be confirmed as a routine transparency step rather than treated as evidence of deception. The absence of a broker-dataset match provides limited contextual reassurance but is not a licensing determination.

EVIDENCE

- The homepage is classified as a corporate banking homepage and presents corporate, customer-support, investor, and regulatory-disclosure content.
- Hosting is on AS136117, operated by IDNIC-BJB-AS-ID – PT Bank Pembangunan Daerah Jawa Barat & Banten, ID.
- TLS uses a DV certificate issued by Go Daddy Secure Certificate Authority – G2, valid through 2026-11-07.

What to Verify Next

Confirm the institution’s current authorization and any applicable service-specific permissions through the relevant official registry, and independently validate the published support and corporate contact channels before material transactions. Review the site’s terms, privacy, complaint-handling, and customer-protection information as part of ordinary financial onboarding.

EVIDENCE

- The corporate-information area provides the appropriate starting point for checking the institution's legal and governance disclosures.
- The support and contact sections provide the channels requiring independent confirmation for high-value or sensitive matters.

Summary Verdict

The website presents as a legitimate, established, and trustworthy banking service with strong identity continuity, clean external reputation, and no observed impersonation or phishing contradictions. Its overall posture supports normal account login, standard use, and ordinary banking interaction.

Infrastructure Integrity

The service resolves to a single likely origin IP with no detected CDN or WAF layer. This provides less edge-layer abstraction than a CDN-backed deployment, but the infrastructure posture remains consistent with the identified institutional hosting environment.

Closing Assessment

Prospective users may proceed with normal interaction and standard banking activity, applying ordinary financial-services verification practices for significant transactions.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bankbjb.co.id.

- The request stayed on bankbjb.co.id. It was not redirected to another domain. CLEAR

- Registration is published under PT Digital Registra Indonesia. [CLEAR](#)
- DNS for this domain is served by co.id, across 2 name servers. [NOTED](#)
- The registration is paid up to 2031-07-20. [CLEAR](#)
- The earliest public archive of this site is from 2010-08-05. [CLEAR](#)
- It is hosted on IDNIC-BJB-AS-ID, from a server in ID. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bankbjb.co.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
