

Is bankjateng.co.id legit? TrustSniffer's high-trust assessment: 80/100

bankjateng.co.id

Verdict

80

OUT OF 100

HIGH TRUST

bankjateng.co.id appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 75%.

What this site appears to be

Official regional bank website (Bank Jateng) providing product information, rates, contact details, regulatory disclosures (OJK, BI, LPS), and news; appears to be legitimate corporate site.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Bank Jateng is a regional commercial banking website presenting personal, business, Islamic-banking, lending, deposit, digital-service, rate, contact, news, and customer-support information. Its apparent purpose is to provide banking products and services for retail customers, businesses, and public-sector or regional stakeholders under the Bank Jateng brand.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent regional-bank profile, with no detected phishing, brand-impersonation, malicious-content, or suspicious behavioral indicators. External reputation checks were clean, and the domain has a sustained historical presence consistent with an established website rather than a newly created impersonation site. The operator's real-world identity remains independently unverified, so the legitimacy assessment is evidence-consistent rather than conclusive proof of the legal operator.

EVIDENCE

- The homepage identifies the service as "Bank Jateng - Banknya Orang Jawa Tengah" and provides structured personal, business, Islamic-banking, contact, news, and customer-support content.
- The site's transport and behavioral testing showed no login form, hidden form, external password form, wallet connection, clipboard manipulation, cloaking, or suspicious inline scripts.
- The domain was registered on 2008-03-05T13:27:20Z and is 18.44 years old; registration is through PT Digital Registra Indonesia.
- Historical records show 295 archive snapshots spanning 2008-08-02T02:33:01Z to 2026-02-09T08:29:55Z across 19 years, with a maximum gap of 1 year and no detected repurposing.

Regulatory Verification Notes

The website's content is consistent with a regulated Indonesian banking model: it presents deposits, loans, KUR-related services, corporate banking, digital services, rates, customer support, and references to OJK, BI, and LPS. These on-site references support an apparently legitimate institutional presentation, but they are not independent confirmation of licensing or of the operator's legal identity. No license number or independently verified registration detail is established in the supplied evidence, making current regulatory status and the exact operating entity appropriate subjects for ordinary verification. The absence of a matched third-party broker profile is contextual and should not be treated as a regulatory determination.

EVIDENCE

- The homepage and disclosure-oriented content reference OJK, BI, and LPS in connection with banking oversight and deposit insurance.
- The site is served from AS7713, PT Telekomunikasi Indonesia, ID, with the hosting organization identified as telkomnet-as-ap - PT Telekomunikasi Indonesia, ID.
- The site uses a DV TLS certificate issued by RapidSSL TLS RSA CA G1, valid to 2026-12-23T23:59:59+00:00.
- The homepage provides banking rates, product information, contact details, announcements, and fraud-awareness content, but the supplied page analysis records no license number or independently verified license claim.

What to Verify Next

Before credential or payment interactions, independently confirm that the intended Bank Jateng contact channel and service endpoint correspond to the institution's official records rather than relying solely on information reached through the website. The applicable banking authorization, deposit-protection scope, service terms, and payment-protection arrangements should also be confirmed through the relevant Indonesian authorities or independently sourced institutional documentation.

EVIDENCE

- The homepage exposes a Contact Center and branch/contact-information pathway that can be cross-checked through an independently sourced institutional channel.
- The product and rates sections provide the specific service context needed to compare the intended account or transaction with independently obtained terms and protections.
- The site offers both Indonesian and English interface options, allowing the relevant disclosures and service conditions to be reviewed in the preferred language.

Summary Verdict

The overall posture is **high trust and low risk**, with available evidence consistent with an established, apparently legitimate regional-bank website. No scam, phishing, impersonation, or other contradictory signal was identified, although the available evidence does not independently verify the real-world operator identity.

Infrastructure Integrity

The site resolves to a single apparent origin address and has no detected CDN or WAF layer. That direct-hosting posture is an infrastructure characteristic rather than a legitimacy concern; it neither establishes nor undermines the site's institutional status.

Closing Assessment

Ordinary independent identity, regulatory-status, service-term, and payment-protection checks should be completed before credentials or payment details are submitted, particularly for higher-value banking activity.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bankjateng.co.id.

- The request stayed on bankjateng.co.id. It was not redirected to another domain. CLEAR
- Registration is published under PT Digital Registra Indonesia. CLEAR
- DNS for this domain is served by rumahweb.com, across 4 name servers. NOTED
- The registration is paid up to 2027-03-07. NOTED
- The earliest public archive of this site is from 2008-08-02. CLEAR
- It is hosted on telkomnet-as-ap, from a server in ID. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bankjateng.co.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
