- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Bank Kalbar is an Indonesian regional banking website presenting savings, lending, banking services, corporate governance, financial reporting, branch access, customer support, and related institutional information. Its apparent business model is conventional banking funded through deposits and lending rather than speculative investment solicitation.

Scam/Impersonation Risk

No contradictions were observed. The supplied pages show no phishing, impersonation, credential-harvesting, deceptive investment, or malicious red-flag indicators; the site also exposes no login or sensitive-data form in the analyzed interface. The website's conventional institutional presentation is consistent with the absence of observed scam mechanics.

- The homepage is classified as a corporate banking homepage with zero reported red flags.
- Behavioral testing recorded no hidden forms, external posts, wallet activity, clipboard hijacking, or cloaking.
- The domain was registered in 2008 and is approximately 17.75 years old.
- Historical coverage includes 312 archive snapshots spanning 2010–2026, across 17 tracked years.

Regulatory Verification Notes

The site provides substantial institutional disclosure, including management and organizational information, annual and sustainability reports, financial statements, governance reporting, risk and capital disclosures, complaint handling, deposit-guarantee information, and alternative dispute-resolution resources. A specific license number or independently verified authorization reference is not presented in the supplied content, so regulatory status should be confirmed through the relevant official Indonesian registry; this is a transparency check, not evidence of impersonation. No matching third-party broker-reputation record was identified.

- The corporate-information pages expose management, ownership, governance, financial-reporting, and risk-disclosure sections.
- The public-information menu includes deposit-guarantee interest-rate information and financial-services dispute-resolution material.
- The domain registrar is PT Digital Registra Indonesia.
- The site is served from AS47583, identified as AS-HOSTINGER – Hostinger International Limited, CY; its TLS certificate is DV, issued by YR2, valid to 2026-10-05.

What to Verify Next

Confirm current authorization and deposit-protection status through the applicable official Indonesian regulatory and guarantee registries, and independently validate the institution’s official contact and branch channels before any material transaction.

- The site provides a branch-office and ATM-location directory for independent channel comparison.
- The customer-support area includes complaint-handling information.
- The site publishes current financial and sustainability-report sections suitable for institutional review.

Summary Verdict

The website presents a legitimate, established, and trustworthy institutional profile with strong alignment between its identity, content, historical continuity, technical stability, and clean external reputation. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves to one identified hosting address in Germany on AS47583, operated by Hostinger International Limited, with no CDN edge layer detected. The infrastructure is directly attributable to a named hosting provider and supported by valid transport encryption, providing a reasonable mitigating signal without independently proving legitimacy.

Closing Assessment

Normal banking interaction is appropriate, with formal regulatory-status confirmation retained as a proportionate control for material institutional decisions.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bankkalbar.co.id.

- The request stayed on bankkalbar.co.id. It was not redirected to another domain. CLEAR
- Registration is published under PT Digital Registra Indonesia. CLEAR
- DNS for this domain is served by niagahoster.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-12. NOTED

- The earliest public archive of this site is from 2010-01-02. CLEAR
- It is hosted on AS-HOSTINGER, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bankkalbar.co.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
