Full analysis

Overview

Bank Lampung's homepage presents a conventional banking institution offering savings, deposits, loans, digital transactions, interest-rate information, branch and ATM services, corporate disclosures, careers, and customer support.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent banking identity, with no detected phishing, brand-impersonation, malicious-content, or suspicious behavioral indicators. Its long operating history, sustained archival presence, and clean external reputation support the conclusion that it is an established legitimate website.

EVIDENCE

- Domain registered in 2002 (~24 years old).
- 331 archive snapshots spanning 2002–2026 (25 years tracked).
- Homepage analysis identified no red flags, phishing forms, hidden forms, or wallet-related behavior.
- External reputation checks recorded no malicious or suspicious detections.

Regulatory Verification Notes

The site provides substantial institutional content through its profile, management, ownership, financial reports, governance materials, branch network, and whistleblowing information. However, the available pages do not clearly disclose a license or registration number, so authorization should be confirmed through the relevant banking registry. A separate broker-reputation comparison produced no matching record; this is contextual only and is not a regulatory determination.

EVIDENCE

- Corporate pages include management, organizational structure, ownership, financial reports, annual reports, and governance disclosures.
- Hosted on AS20940 (Akamai International B.V., NL).
- TLS certificate issued by DigiCert Global G3 TLS ECC SHA384 2020 CA1, using OV validation, valid to 2026-12-02.
- Homepage provides branch, ATM, customer-contact, and whistleblowing sections.

What to Verify Next

Confirm the institution's current authorization and legal identity through the relevant Indonesian banking regulator's official registry. For material transactions, independently cross-check branch or contact details using an established offline channel and retain normal institutional approval records.

EVIDENCE

- The site's corporate and governance pages provide the identity materials needed for registry comparison.
- The homepage's branch and customer-contact sections provide reference points for independent confirmation.

Summary Verdict

The website has an established, legitimate, and trustworthy posture with strong identity continuity and no observed contradiction or impersonation indicators. Normal interaction, including account login and standard banking use, is appropriate.

Infrastructure Integrity

The website is protected by Akamai CDN/WAF infrastructure, with observed traffic served through AS20940 edge addresses and no origin candidate exposed in this analysis. This reduces direct origin exposure and is a mitigating infrastructure characteristic, not independent proof of legitimacy.

Closing Assessment

Normal account access and standard banking activity are appropriate, with ordinary institutional verification and approval controls retained for high-value transactions.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about banklampung.co.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
