Full analysis

Overview

This website presents itself as the official online presence of PT. BPRS Mitra Agro Usaha, also branded as Bank MAU Syariah, a regional Islamic bank offering sharia-compliant savings, deposit, and financing services alongside corporate information, publications, news, careers, and customer-contact facilities.

Scam/Impersonation Risk

No contradictions were observed. The site's stated institutional identity, banking-oriented content, corporate information, and public-facing reporting structure are consistent with an established regional financial-services website, while available reputation signals show no malicious detection, blacklist hit, abuse report, phishing indicator, or suspected brand impersonation. The real-world operator remains independently unverified, so the evidence supports an apparently legitimate site rather than proving the identity of the operating entity.

EVIDENCE

- The homepage identifies “PT.BPRS MITRA AGRO USAHA” and “Bank MAU Syariah” and presents the site as a corporate/regional bank.
- Registration records show the domain was created on 2016-04-01 and is approximately 10.39 years old.
- Historical records contain 86 archive snapshots spanning 2017–2026, covering 10 years.
- Available external reputation signals record zero abuse reports and no malicious or blacklist finding.

Regulatory Verification Notes

The website states that Bank MAU Syariah is licensed and supervised by Indonesia's Otoritas Jasa Keuangan and participates in the Lembaga Penjamin Simpanan guarantee scheme. Its pages include institutional profile, history, organisational structure, staff and directors, governance reports, quarterly and annual reports, security-policy information, and public banking products such as savings, deposits, gold pawning, and sharia financing. These disclosures are positive indicators of an institutionally structured site, but the reviewed evidence does not independently verify the regulatory claims or provide a verified license number; this is a verification gap rather than evidence of misconduct. The domain registrar is identified as PT Web Commerce Communications, and the site uses valid transport encryption.

EVIDENCE

- The homepage states OJK supervision and LPS participation and provides links to institutional and reporting materials.
- Registration records identify PT Web Commerce Communications as the registrar.
- The site is served from AS13335 (CLOUDFLARENET – Cloudflare, Inc., US).
- The TLS certificate is issued by WE1 at DV validation level and is valid to 2026-11-19 01:41:26 UTC.

What to Verify Next

Before credential or payment interactions, an institution or prospective customer should independently confirm the bank's legal identity and OJK authorisation through the relevant official registry, and confirm that the LPS participation statement corresponds to the same entity. Contact and complaint channels should be validated through an independently sourced telephone number or branch contact, and any deposit or financing transaction should be assessed against applicable payment-protection, documentation, and dispute procedures.

EVIDENCE

- The site provides dedicated “Contact & Complaints” and corporate-information areas suitable for comparison with independently sourced institutional records.
- The site publishes governance, quarterly, and annual-report sections that can be reconciled against official regulatory disclosures.
- The homepage presents specific OJK and LPS claims that require registry-level confirmation before financial commitment.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradictions. The principal residual uncertainty concerns independent attribution of the real-world operator, not observed malicious website behavior.

Infrastructure Integrity

The website is protected by Cloudflare's CDN/WAF infrastructure, with all observed addresses belonging to Cloudflare edge servers and no origin server address exposed in the analysis. This provides a meaningful layer of operational and abuse mitigation, but remains a protective infrastructure characteristic rather than proof of institutional legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the observed risk posture; credential submission or financial transactions should follow the independent identity, regulatory, contact-channel, and payment-protection checks described above.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bankmausyariah.co.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
