- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1998.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Bankmed is a South African medical scheme website presenting healthcare plans, member benefits, wellness services, claims tools, digital health resources, member login, and support channels. Its apparent business model is the administration of medical-scheme coverage funded through member and employer-group contributions.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent healthcare-service model rather than investment, high-yield, or cryptocurrency activity, and provides ordinary member functions such as claims submission, healthcare-provider search, medication lookup, and account access. The observed login function is consistent with the stated service model, with no detected phishing, impersonation, malicious, or deceptive indicators.

- The homepage identifies Bankmed as a medical scheme offering plans, benefits, wellness support, claims tools, and member services.
- The homepage contains one contact/query form with no untrusted destination or sensitive-form anomaly.
- Browser testing recorded no cloaking, hidden forms, wallet activity, clipboard manipulation, suspicious scripts, or external-post anomalies.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.

Regulatory Verification Notes

The site provides substantive identity and governance-oriented content, including “About Us,” “Board of Trustees,” “Registered Rules,” benefit information, and member-support resources. The supplied evidence does not confirm a licensing or registration number on the site; this is a verification item for the medical-scheme relationship, not evidence of impersonation. The domain, certificate, stable operation, and clean external reputation provide strong supporting context for an established operating website.

- The homepage navigation links to “Board of Trustees” and “Registered Rules,” alongside plans, benefits, wellness, and member-support pages.
- The domain was registered on 1994-12-31 and is 31.6 years old; the registrar is MarkMonitor.
- Archive records contain 37 snapshots across 13 tracked years from 1998-02-07 to 2010-07-22.
- TLS is OV-validated, issued by DigiCert Global G2 TLS RSA SHA256 2020 CA1 for Discovery Bank Ltd, valid through 2026-11-12.

What to Verify Next

Before establishing a formal institutional relationship, confirm the scheme’s current registration and operating status through the relevant official registry, and validate the published support and member-service channels using independently sourced contact details. Standard account login and routine member use are appropriate.

- The site publishes legal and governance navigation through “Board of Trustees” and “Registered Rules.”
- The homepage provides member login, registration, claims submission, and support functions.
- The observed site behavior completed two successful runs with stable HTTP responses and no suspicious interaction behavior.

Summary Verdict

Bankmed presents as a legitimate, established, high-trust healthcare-services website. The available evidence supports normal interaction, including account login and standard member actions, with no observed contradiction requiring a heightened security posture.

Infrastructure Integrity

The website is protected by Incapsula CDN/WAF infrastructure. Observed addresses were CDN edge servers, with the origin not exposed in this analysis; this reduces direct origin exposure and is a mitigating infrastructure characteristic, not independent proof of legitimacy.

Closing Assessment

Normal member and account activity may proceed, while formal counterparties should complete their usual registry and contact-channel validation before entering a contractual relationship.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bankmed.co.za.

- The request stayed on bankmed.co.za. It was not redirected to another domain. CLEAR
- Registration is published under MarkMonitor. CLEAR
- DNS for this domain is served by awsdns-51.org, across 4 name servers. NOTED
- The registration is paid up to 2026-12-31. NOTED

- The earliest public archive of this site is from 1998-02-07. CLEAR
- It is hosted on INCAPSULA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bankmed.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
