Full analysis

Overview

Bank SulutGo is an established banking website presenting savings and deposit products, credit services, digital banking, payments, foreign-exchange information, investor relations, corporate governance, branch details, and customer-support options. Its apparent business model is conventional commercial banking supported by interest income, fees, and related regulated financial services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent banking identity, detailed product and service categories, financial reporting, governance information, branch and ATM coverage, and no phishing indicators, deceptive high-yield claims, brand-impersonation signals, or suspicious credential forms. The site's established operating history and clean external reputation materially support its legitimacy.

- The homepage identifies Bank SulutGo and presents banking, credit, payment, digital-service, foreign-exchange, and investor-relations content.
- The domain was registered in 2015 and is approximately 10.69 years old.
- Archive records show 184 snapshots spanning 2016–2026, covering 11 tracked years.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no blacklist or phishing result.

Regulatory Verification Notes

The About and Investor Relations areas provide substantive corporate information, including directors, commissioners, shareholders, organizational structure, company history, anti-bribery management, governance materials, and periodic financial reports. The site's licensing and authorization disclosure remains unclear in the supplied content; this is a regulatory-transparency matter requiring confirmation, not evidence of impersonation or fraud. No matching third-party broker warning was identified.

- The site is hosted on AS138868, IDNIC-RUMAHCLOUD-AS-ID – CV. RUMAH CLOUD INDONESIA, Indonesia.
- Transport encryption uses a DV TLS certificate issued by GlobalSign GCC R6 AlphaSSL CA 2025, valid to 2026-10-21 21:24:19 UTC.
- The About and Investor Relations pages expose governance, ownership, reporting, and corporate-history sections.
- The homepage provides banking and deposit-insurance-related information areas alongside formal financial-reporting links.

What to Verify Next

Before institutional onboarding or regulated financial reliance, confirm the entity’s current authorization and deposit-insurance status through the relevant official registries, and independently validate published contact and branch channels using authoritative Bank SulutGo records.

- The site contains dedicated corporate, governance, investor, branch, and customer-contact areas suitable for independent cross-checking.
- The homepage presents current banking-service and exchange-rate information that can be matched against official records.

Summary Verdict

The website presents a high-trust, established, and legitimate posture. Its identity, content maturity, historical continuity, technical operation, and external reputation converge without observed contradiction; normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to a single likely origin IP, with no CDN or WAF identified. This provides less edge-layer protection than a CDN-backed deployment, but the infrastructure configuration is not, by itself, an indicator of malicious activity.

Closing Assessment

Standard banking interaction is appropriate, with authorization and institutional details independently confirmed where formal compliance requirements apply.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about banksulutgo.co.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
