The page as captured

https://baobimocan.vn/

What baobimocan.vn served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website at baobimocan.vn is a Vietnamese-domain web property whose specific visitor-facing purpose and business model are not established by the supplied page evidence.

Scam/Impersonation Risk

A confirmed blacklist hit creates a material security concern and is the decisive negative signal in the assessment. The external reputation evaluation also recorded one malicious and one suspicious detection. No conflicting legal identities or direct brand-impersonation finding were recorded, and observed browser behavior did not show wallet-drainer activity, hidden forms, cloaking, or suspicious inline scripts; those benign technical observations do not offset the reputation risk associated with the confirmed blacklist status. The domain has multi-year registration continuity and continuous historical presence, but that provenance does not establish that the current operator is legitimate or suitable for sensitive interaction.

EVIDENCE

- The domain is recorded as registered approximately 4.73 years ago, with 49 archive snapshots spanning 2021-11-27 through 2026-01-24 across 6 tracked years.
- An external reputation evaluation recorded `external\_blacklist: true`, with 1 malicious and 1 suspicious detection.
- Two successful behavioral runs recorded 0 wallet-connect runs, 0 wallet-drainer runs, 0 hidden forms, 0 password-external forms, and 0 cloaking detections.

Regulatory Verification Notes

The operator's real-world identity is not independently verified, and the supplied evidence does not establish licensing or regulatory authorization. This is a verification requirement rather than proof of fraud; the available material is insufficient to treat any on-site representation as evidence of regulated status. The supplied broker-reputation context returned no match, but that result is contextual only and is not a legal, licensing, or regulatory determination.

EVIDENCE

- The site's transport encryption uses a DV certificate issued by WE1, valid to 2026-10-31.
- Confirmed technical evidence identifies hosting on AS13335, operated by CLOUDFLARENET — Cloudflare, Inc., US.
- The supplied broker-reputation context returned `matched: false`.

What to Verify Next

Before any sensitive interaction, an organization should independently identify the legal operator and confirm any claimed authorization directly with the relevant national or sector regulator. The homepage and any identity, terms, or contact pages should be checked for a consistent legal name, jurisdiction, registration details, and accountable support channel. Any proposed payment or account activity should use transaction protections that permit dispute or recovery, with the beneficiary identity independently matched to the verified operator.

EVIDENCE

- The supplied identity-verification status is `unknown`, with no independent real-world operator linkage established.
- The regulatory disclosure state is `UNCLEAR`; no licensing conclusion is supported by the available evidence.
- The site was technically reachable with HTTP 200 behavior, but the supplied page material does not establish its business purpose or operator identity.

Summary Verdict

The site carries a **highly cautionary sensitive-interaction posture**. Although the deterministic classification remains high trust overall, the confirmed reputation contradiction means that legitimacy is not established for login, credential, or financial activity. Identity uncertainty further limits the defensibility of treating the site as an approved counterparty.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all four observed addresses were CDN edge addresses on AS13335; the origin server address was not observable. This is a mitigating exposure-control measure only and does not validate the website’s operator or reputation.

Closing Assessment

Sensitive activity should remain deferred until independent identity, authorization, and reputation checks are completed; any unavoidable initial engagement should be limited to non-sensitive observation.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNKNOWN
Identity score	50/100
Identity verification confidence	30%

- AI page analysis unavailable (page captured; identity not AI-verified)

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of baobimocan.vn.

- The request stayed on baobimocan.vn. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2021-11-27. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about baobimocan.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
