

Is bardaiconnect.com a scam? TrustSniffer's high-risk assessment: 0/100

bardaiconnect.com

Verdict

0

OUT OF 100

CRITICAL RISK

bardaiconnect.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

Bardai Connect is a small matrimonial site focusing on Bardai Brahmin community. The page is primarily a login/registration interface with brief navigation and footer; there is minimal descriptive or trust information.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

What bardaiconnect.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Bardai Connect is a community matrimonial and matchmaking website focused on the Bardai Brahmin community. It presents visitors with member-profile registration and login functions, directory and gallery navigation, and a claim of more than 100 registered profiles, with the apparent purpose of enabling members to exchange requests and view profile details after approval.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. Its principal contradiction is a confirmed blacklist status supported by multiple external security detections, including malicious classifications from several evaluators. The page itself is predominantly a login and registration interface with limited context about the service, operator, safeguards, or commercial model; this materially increases the exposure associated with submitting credentials or personal information. No conflicting legal-entity names or clear brand-impersonation indicators were identified in the supplied page analysis, but those absences do not offset the external security findings.

EVIDENCE

- The login page contains email-address and password fields and is classified as “Login-only / Unknown,” with the red flag “LOGIN_PAGE_ONLY_NO_CONTEXT.”
- External reputation telemetry recorded 9 malicious and 1 suspicious detections, with a confirmed blacklist result and Tier-1 threat detections.
- The domain was registered in 2018 and is approximately 8.19 years old; registration is shown through GoDaddy.com, LLC.
- The site has 227 archive snapshots spanning 2018-08-15 through 2026-02-22, covering 9 tracked years.

Regulatory Verification Notes

The available content does not independently verify the real-world operator or establish a regulated status. The homepage and navigation identify the service as Bardai Connect and display “Bardai Brahmin Samaj Matrimonial,” while the footer attributes copyright to “PuroTechSol”; these are on-site references rather than proof of the responsible legal entity. The supplied content does not present a licensing claim or registration number, and the commercial basis of the service is unclear. For a matrimonial platform, the key verification issues are therefore operator identity, privacy governance, member-safety controls, complaint handling, and any applicable consumer or payment obligations. A separate broker-reputation dataset produced no match, which is contextual only and does not provide regulatory assurance.

EVIDENCE

- The homepage footer states “© Copyright 2018 PuroTechSol,” while the visible service branding is Bardai Connect and Bardai Brahmin Samaj Matrimonial.
- The page provides Home, About, Contact, and News navigation but the captured content contains only limited descriptive and trust information.
- The site’s transport encryption uses a DV certificate issued by YR2, valid through 2026-10-26.

What to Verify Next

Before any sensitive interaction, an independent party should confirm the legal operator and its relationship to the Bardai Brahmin community through an offline or independently sourced contact route. The About, Contact, privacy, terms, and complaint-handling pages should be reviewed for a named entity, physical address, data-retention practices, profile moderation, and account-deletion procedures. If membership fees or other payments are requested, the payment recipient, refund terms, and applicable consumer protections should be verified independently; credentials should not be reused from other services.

EVIDENCE

- The site exposes About and Contact navigation that can be checked for complete operator and privacy disclosures.
- The homepage claims “Registered Profiles: 100+”; the authenticity, moderation, and provenance of those profiles should be independently assessed.
- The registration flow allows account creation and profile access only after login, making the quality of the underlying privacy and moderation controls material to the decision.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The available evidence does not establish a trustworthy connection to a verified real-world operator, and the external security contradictions outweigh the site’s otherwise continuous technical presence. Account access, credential submission, personal-data disclosure, and financial interaction should be treated as materially exposed.

Infrastructure Integrity

The site resolves directly to hosting provided by Unified Layer in the United States, with no CDN detected and one likely origin address. The hosting arrangement is technically identifiable, but it does not provide a protective CDN/WAF layer capable of mitigating the reputation findings; infrastructure should therefore be regarded only as limited contextual evidence, not as a legitimacy indicator.

EVIDENCE

- Served from AS46606 (Unified Layer, US).
- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.

Closing Assessment

Sensitive use should be withheld unless the operator, data-handling practices, and payment arrangements are independently validated through trusted channels; existing credentials should not be entered or reused on the site.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, page content, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- The page presents a sign-in form, and the operator behind it could not be independently verified.
Page content rule:PAGE_TYPE_LOGIN_UNVERIFIED
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE
- A sign-in path on this site handles sensitive information.
Page content rule:PAGE_LOGIN_PATH_SENSITIVE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bardaiconnect.com.

- The request stayed on bardaiconnect.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by bigrockservers.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-06-12. [NOTED](#)
- The earliest public archive of this site is from 2018-08-15. [CLEAR](#)
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bardaiconnect.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
