

Is basterbeek.com legit? TrustSniffer's high-trust assessment: 100/100

basterbeek.com

Verdict

100

OUT OF 100

HIGH TRUST

basterbeek.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Small-business landing page for Bas ter Beek offering social media video services (advertisement shoots, content shoots, live shopping) with package pricing, portfolio examples, local business registration (KVK) and booking CTAs.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What basterbeek.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Bas ter Beek is a small-business website presenting social-media video production services for advertising shoots, content creation, and live shopping. It promotes conversion-focused video for platforms such as TikTok, Instagram, and Facebook, displays portfolio examples and package pricing, and directs prospective customers toward booking or contact actions.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting-identity indicators were observed. The homepage presents a coherent service business under the Bas ter Beek name, with identifiable offerings, portfolio examples, pricing, and local-business context; its content and observed behavior are consistent with an ordinary commercial services site rather than a credential-harvesting or investment operation. Abuse reports associated with the observed IP address are attributed to shared CDN infrastructure, so they do not establish malicious activity by this website. The available evidence is therefore consistent with an established, apparently legitimate site, while the operator's real-world identity remains independently unverified.

EVIDENCE

- The homepage identifies Bas ter Beek and presents social-media advertising, content-shoot, and live-shopping services with portfolio material and booking calls to action.
- The observed page behavior recorded no login form, hidden form, wallet connection, clipboard activity, wallet-drainer activity, or external POST activity.
- The domain registration record shows registration on 2019-08-22 and an age of 7 years.
- Archive records show 8 snapshots spanning 2021–2025, with 5 years tracked.

Regulatory Verification Notes

The site operates as a service provider rather than presenting a regulated financial product. Its page summary references a local Chamber of Commerce registration (KVK), but the supplied evidence does not independently verify that registration or identify a registration number. This is a transparency item for ordinary commercial due diligence, not evidence of deception. The site's stated business model, transparent package pricing, portfolio presentation, and booking process provide useful commercial context; however, the available evidence does not independently connect the online presentation to a verified legal entity. A third-party broker dataset produced no name match, which is contextual only and not a licensing or regulatory determination.

EVIDENCE

- The homepage states that the business provides social-media video production and shows packages including an advertisement shoot priced at €450.
- The site content identifies local service coverage associated with Hengelo and references local business registration (KVK).
- The registration record names Hosting Concepts B.V. d/b/a Registrar.eu as registrar.
- The site's transport encryption uses a DV certificate issued by WE1, valid to 2026-11-02.

What to Verify Next

Before credential or payment interactions, the prospective customer should independently confirm the KVK registration and that its legal name corresponds to the contracting party. The customer should also review the applicable quotation, cancellation and refund terms, confirm the booking and invoicing entity through an independently sourced contact route, and use payment protections appropriate to a business-service purchase.

EVIDENCE

- The homepage provides service packages, pricing, portfolio examples, and booking calls to action that can be reconciled against a formal quotation or invoice.
- The supplied page analysis found no sensitive form and no untrusted form destination.
- The site presents local-business and contact context suitable for independent commercial-identity checks.

Summary Verdict

The website has a high-trust, low-risk posture and no observed scam or impersonation contradictions. Available evidence is consistent with an established, apparently legitimate small-business service website, although the

real-world operator identity is not independently verified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with the observed edge address associated with AS13335 and Cloudflare, Inc.; no origin server candidate was exposed in the analysis. This shared edge architecture is a mitigating security measure, but it is infrastructure protection rather than proof of business legitimacy.

Closing Assessment

Normal browsing and ordinary service evaluation are proportionate, with independent confirmation of the contracting entity, commercial terms, and payment protections before credentials or funds are provided.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 50 reports on hosting IP 185.158.133.1 (Internet Utilities Europe and Asia Limited, Content Delivery Network), 45% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of basterbeek.com.

- The request stayed on basterbeek.com. It was not redirected to another domain. CLEAR
- Registration is published under Hosting Concepts B.V. d/b/a Registrar.eu. CLEAR
- DNS for this domain is served by hosted.nl, across 3 name servers. NOTED
- The registration is paid up to 2026-08-22. NOTED
- The earliest public archive of this site is from 2021-11-27. CLEAR
- It is hosted on CLOUDFLARENET, from a server in AE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about basterbeek.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
