- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an English-language news and media publication presenting reporting and opinion on Argentina, Latin America, world affairs, culture, sports, politics, and the economy. Its apparent business model is an advertising- and subscription-supported journalism platform, potentially supplemented by memberships and content syndication.

Scam/Impersonation Risk

No contradictions were observed: there were no phishing indicators, confirmed blacklist findings, malicious reputation results, or evidence of wallet-drainer, cloaking, or hidden-form activity. The homepage presents a coherent editorial publication rather than a transactional or investment service, and its substantial historical continuity supports an established-site interpretation. A page-comparison signal associated the domain with the unrelated time.com brand through lookalike similarity, but this did not establish impersonation and is outweighed by the absence of corroborating phishing or brand-conflict evidence. Dynamic testing recorded elevated external activity and substantial page mutation, yet no sensitive form, wallet, clipboard, or credential-capture behavior was observed; in the context of an advertising-supported publisher, these observations are not independently indicative of fraud.

EVIDENCE

- The homepage is identified as “News from Argentina and beyond – in English,” with sections for Argentina, Economy, Latin America, World, Culture, Sports, and Opinion.
- The domain was registered on 2013-08-27 and is 12.96 years old.
- The archive records 5,000 snapshots across 6 tracked years, from 2017-09-05 through 2022-02-12.
- External reputation checks recorded 0 malicious and 0 suspicious results, with no external blacklist finding and 0 abuse reports for the observed CDN address.

Regulatory Verification Notes

The site appears to operate as a news publisher rather than a regulated financial, brokerage, or payment entity, so the absence of a financial licence claim is not itself evidence of misconduct. On-page disclosure remains unclear for purposes of independently connecting the publication to its real-world operator; the registration record names EDITORIAL PERFIL SOCIEDAD ANONIMA, but that record alone does not verify that the entity operates the website. The publication’s editorial scope, advertising-supported model, and established content history are consistent with an ordinary media business. No separate broker-reputation match was identified, and

the available third-party context should be treated only as reputational background rather than a licensing determination.

EVIDENCE

- The homepage contains a substantial article index covering politics, economy, culture, sports, and opinion concerning Argentina and the region.
- The registration record identifies EDITORIAL PERFIL SOCIEDAD ANONIMA as the owner and nicar as registrar.
- The site is served from AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- The transport certificate is issued by WE1, uses DV validation, and is valid through 2026-09-21.

What to Verify Next

Before credential or payment interactions, independently confirm that the named publishing entity is associated with the publication through an authoritative corporate or publisher source. For any subscription or membership transaction, review the applicable terms, renewal conditions, privacy provisions, cancellation process, and refund arrangements. Official contact channels should also be confirmed through an independent route before sensitive account or billing matters are handled.

EVIDENCE

- The site presents advertising- and subscription-supported publishing as its apparent commercial model.
- The homepage contains no login form, sensitive input form, or untrusted form destination in the observed capture.
- The observed page contained one analytics service, one advertising network, and one tracking pixel, consistent with the stated advertising-supported model.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a low-risk trust posture. No scam, phishing, blacklist, or identity-conflict indicators were observed, although the real-world operator connection remains independently unverified.

Infrastructure Integrity

The website is protected by Cloudflare’s CDN/WAF, and all observed addresses were CDN edge infrastructure rather than a directly exposed origin. This reduces direct origin exposure and provides a meaningful defensive control, but remains a mitigating infrastructure characteristic rather than proof of operator legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the observed posture; before submitting credentials or payment details, independent checks of the operator, commercial terms, and payment protections should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of batimes.com.ar.

- The request stayed on batimes.com.ar. It was not redirected to another domain. CLEAR
- Registration is published under nicar. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-08-28. NOTED
- The earliest public archive of this site is from 2017-09-05. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about batimes.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
