Full analysis

Overview

Bayrak Sigorta is a local Edirne insurance agency website presenting traffic and automobile insurance, kasko, health, home, and cargo coverage, with quote-oriented contact options through telephone, email, WhatsApp, and physical office addresses. Its apparent business model is insurance brokerage or policy solicitation, and the site states that it has provided professional insurance services since 2014.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent local-service identity, insurance-focused content, office information, and no login form, hidden form, cryptocurrency feature, investment promise, or detected brand-impersonation pattern. Three abuse reports relate to the hosting IP rather than the website identity; the attribution is to shared data-center infrastructure, so this is a limited infrastructure-reputation signal and does not establish malicious activity by Bayrak Sigorta.

EVIDENCE

- The homepage identifies Bayrak Sigorta as an Edirne insurance business and provides service descriptions, office information, telephone contact, and quote-oriented contact options.
- The domain was registered on 2020-06-04 and is approximately 6.22 years old.
- Historical records show 152 archive snapshots spanning 2015–2025, covering 11 tracked years.
- The hosting IP has 3 abuse reports with a confidence score of 12; the reports are attributed to shared infrastructure operated by Bitwise Yazilim Internet Ve Ticaret Limited Sirketi.

Regulatory Verification Notes

The available content is consistent with an apparently legitimate local insurance agency, but the real-world operator identity is not independently verified by the supplied evidence. The site content does not display a licensing authority or license number, leaving the agency's authorization status and the precise legal entity behind the service to be confirmed independently. This is a regulatory-transparency matter, not evidence of impersonation or a scam. The available broker-reputation context contains no matching warning.

EVIDENCE

- The homepage describes insurance brokerage services for individuals and businesses and states that the agency compares offers among multiple insurance companies.
- No licensing authority or license number is shown in the supplied business-page content.
- The site is served through AS211567, Bitwise - Bitwise Yazilim Internet Ve Ticaret Limited Sirketi, TR.
- The site's TLS certificate is issued by YR2 at DV validation level and is valid through 2026-11-04.

What to Verify Next

Before credential or payment interactions, independently confirm the agency's legal name, office details, and authorization with the relevant Turkish insurance or commercial registry. Confirm that any proposed policy is issued by the named insurer, review the policy wording and cancellation terms, and use payment methods offering appropriate consumer protection. Contact details should also be cross-checked through an independently sourced business record or offline route.

EVIDENCE

- The homepage supplies physical office addresses and a local telephone number that can be cross-checked independently.
- The site's quote-oriented model makes confirmation of the actual insurer and policy issuer material before payment.
- The supplied content does not identify a licensing authority or license number, making registry confirmation the appropriate next step.
- No sensitive submission form or password-capture form was detected during site interaction.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-conflict indicators were observed, while

independent confirmation of the operating entity remains appropriate because operator identity is not verified.

Infrastructure Integrity

The site resolves directly to hosting infrastructure provided by Bitwise - Bitwise Yazilim Internet Ve Ticaret Limited Sirketi, on AS211567, with one identified likely origin address and no detected CDN or WAF layer. Its valid DV TLS certificate provides transport protection, but the hosting arrangement itself is a mitigating technical characteristic rather than proof of business legitimacy.

Closing Assessment

Normal informational use is proportionate to the evidence; account or payment interactions should follow the ordinary independent identity, policy, and payment-protection checks applicable to an unfamiliar insurance intermediary.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bayraksigorta.com.tr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
