Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is an informational landing page for “BB Gym” and “BB Gymnastic Centre,” presenting navigation to pricing, contact, and about pages for a local gymnastics or fitness business whose apparent model is to promote classes, memberships, and local service bookings.

Scam/Impersonation Risk

The site’s visible content is a simple local-business presentation with no login form, payment flow, crypto functionality, or other sensitive interaction identified. However, that benign page profile is materially outweighed by confirmed external threat detections and blacklist status: multiple security providers classified the domain as malicious or suspicious, and the domain appears on external blacklist sources. No brand-impersonation finding or conflicting legal-entity names were established, so the principal concern is the domain’s external threat reputation rather than a demonstrated identity contradiction. The combination warrants treating credentials, payments, downloads, and other sensitive interactions as unsafe pending independent resolution of the detections.

EVIDENCE

- The homepage presents “BB Gym,” “BB Gymnastic Centre,” and links to Pricing, Contact Us, and About Us; no login or sensitive form was observed.
- External reputation telemetry recorded 9 malicious and 1 suspicious detections among 15 evaluated results, with Kaspersky and Sophos identified among the flagged providers.
- The domain was registered on 2008-02-28 and has an age of 18.49 years.
- Archive coverage is recorded from 2009-10-07 through 2025-07-10, spanning 17 years of tracked history; the available archival coverage is sparse.

Regulatory Verification Notes

The apparent business purpose is ordinary local gym and gymnastics-centre activity, but the site does not provide a clear legal-entity identification, licensing statement, registration number, or equivalent governance disclosure in the supplied pages. The operator’s real-world identity therefore remains unverified. This is a regulatory and transparency gap rather than, by itself, proof of fraud. The domain is registered through Web Commerce Communications Limited dba WebNic.cc, while the site’s transport security uses a Domain Validated certificate; neither fact independently establishes the operator’s legal identity or regulatory standing. No matching broker signal was identified in the available third-party context.

EVIDENCE

- The homepage and navigation identify the service as BB Gym / BB Gymnastic Centre but do not state a clearly verifiable legal entity.
- The supplied Pricing, Contact, and About page content does not show a license, registration number, or named licensing authority.
- The site is registered through Web Commerce Communications Limited dba WebNic.cc; registration expiry is 2027-02-28.
- TLS is issued by WE1 at DV validation level and is valid to 2026-10-17.

What to Verify Next

Before any sensitive interaction, an institution should independently confirm that the named gym exists through an offline or authoritative local source, obtain the operator’s legal name and physical business details, and reconcile those details with the relevant business registry. Any claimed licensing or safety accreditation should be checked directly with the responsible authority, and contact channels should be confirmed through an independently sourced route rather than relying solely on the website.

EVIDENCE

- The About Us page is the appropriate location to confirm the operating entity, management details, and physical premises.
- The Pricing page should be reconciled with independently confirmed membership terms, cancellation conditions, and payment arrangements.
- The Contact Us page should be checked against independently obtained telephone, address, or business-directory information.
- The site's external malicious and blacklist detections require resolution with the relevant security and domain-reputation authorities before sensitive use.

Summary Verdict

The overall posture is **critical trust risk**. Although the visible site presents a low-complexity local-business proposition, the confirmed malicious detections and blacklist status create a decisive barrier to treating the domain as trustworthy for sensitive interaction, and the operator identity remains unverified.

Infrastructure Integrity

The website is served through Cloudflare's CDN/WAF infrastructure, with all observed addresses located at CDN edge servers and no origin server candidate identified in this analysis. This provides a mitigating layer against direct origin exposure but does not validate the site's legitimacy or offset the external threat reputation. Confirmed technical evidence shows hosting on AS13335 operated by Cloudflare, Inc. in the United States.

Closing Assessment

Sensitive actions should be withheld unless the domain's external detections are independently cleared and the operating entity is verified through trusted channels.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bbgimn.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
