

Is bccittechnology.com legit? TrustSniffer's high-trust assessment: 90/100

bccittechnology.com

Verdict

90

OUT OF 100

HIGH TRUST

bccittechnology.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Marketing website for BCC IT Technology offering IT support, network/security, CCTV and server services across India. Contact phone numbers and an email are present. Content is promotional with service descriptions, testimonials and package outlines; no obvious financial schemes, login harvesting, or crypto/transaction flows.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What bccittechnology.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a small-business IT services site for BCC IT Technology, presenting IT support, network and server maintenance, backup services, CCTV and home-security installations, biometric systems, and related technical support for customers across India. Its apparent business model is the sale of on-site and remote support, service contracts, one-off technical work, and packaged IT services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate service model rather than a financial, cryptocurrency, or credential-harvesting operation; available page analysis found no login form, sensitive data form, hidden form, wallet functionality, or obvious phishing indicators. Promotional statements such as “1000+ locations across India,” “over 20 years of experience,” and continuous support availability are business claims that are not independently established by the supplied evidence, but they do not by themselves

indicate impersonation or fraud. The site is therefore apparently legitimate and evidence-consistent with an established service business, while the real-world operator identity remains unverified.

EVIDENCE

- The homepage identifies BCC IT Technology and describes networking, router, backup, Windows, server, CCTV, and attendance-system services.
- The homepage contains no login-harvesting or sensitive-input form, and the behavioral review detected no wallet, password-exfiltration, clipboard-hijacking, or cloaking activity.
- Domain registration telemetry: registered 2019-10-07 and approximately 6.87 years old.
- Archive telemetry records 15 snapshots spanning 2019–2026, with 8 years tracked and no detected category repurposing.

Regulatory Verification Notes

The website appears to operate as a commercial IT-services provider rather than a business presenting regulated financial products. Its pages provide service descriptions, testimonials, package outlines, telephone contacts, and an email address, but the supplied content does not identify a licensing regime, registration number, or clearly documented legal entity. This is a transparency item for ordinary commercial due diligence, not evidence of a scam. The site's apparent legitimacy is supported by a long-established registration, a clean set of evaluated external reputation results, recognized commercial hosting, and valid transport encryption; none of these independently verifies the operator's legal identity.

EVIDENCE

- The homepage and navigation expose About, Services, Our Team, Blog, and Contact sections, with no identified license or registration number in the supplied content.
- Registration telemetry: registrar GoDaddy.com, LLC; creation date 2019-10-07T14:06:57Z; expiration date 2031-10-07T14:06:57Z.
- Hosting telemetry: AS26496, AS-26496-GO-DADDY-COM-LLC / GoDaddy.com, LLC, US.
- TLS telemetry: issuer YR2, DV validation, valid through 2026-11-10T16:59:54+00:00.

What to Verify Next

Before a paid engagement, the prospective customer should obtain the contracting entity's legal name, service terms, warranty and liability provisions, and a formal invoice that can be reconciled with the contracting party. Any claimed business registration should be checked against the relevant Indian corporate or tax registry, and payment should use a method providing appropriate commercial dispute and refund protections. Contact details should also be confirmed through an independent route before remote-access support or equipment installation is authorized.

EVIDENCE

- The homepage provides service packages and commercial support descriptions suitable for reconciliation against a written statement of work.
- The Contact page and homepage provide the primary business contact channels that should be independently confirmed.
- The site describes remote and on-site technical assistance, making authorization scope and remote-access controls relevant to the engagement.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradictions. The classification supports ordinary business interaction, but it does not independently prove the identity of the real-world operator.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, and the observed address was an edge address rather than an exposed origin address. This reduces direct origin exposure and is a mitigating infrastructure characteristic, although protective hosting remains distinct from proof of business legitimacy.

Closing Assessment

Normal commercial engagement is reasonable when supported by independent confirmation of the contracting entity, clear written service terms, and payment protections appropriate to the value and sensitivity of the work.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bccittechnology.com.

- The request stayed on bccittechnology.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2031-10-07. CLEAR

- The earliest public archive of this site is from 2019-11-17. CLEAR
- It is hosted on AS-26496-GO-DADDY-COM-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bccittechnology.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
