

Is bdtermoidraulica.it a scam? TrustSniffer's high-risk assessment: 0/100

bdtermoidraulica.it

Verdict

0
OUT OF 100

CRITICAL RISK

bdtermoidraulica.it shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be	Website for BD Termoidraulica (Barillari Davide) offering HVAC, boilers, pellet stoves, bathroom renovation and photovoltaic system installation and maintenance in Cambiago/Milan area. Contains service listings, certifications, contact details and local business info.
------------------------------	--

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://www.bdtermoidraulica.it/>

What bdtermoidraulica.it served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

What appears to be a local Italian HVAC and plumbing service website, BD Termoidraulica presents heating, air-conditioning, boiler, pellet-stove, bathroom-renovation, photovoltaic, installation, maintenance, and assistance services for residential and business customers in the Cambiago/Milan area.

Scam/Impersonation Risk

The site's visible content describes a conventional local service business and does not present a login form, credential-collection workflow, cryptocurrency function, or other observed phishing mechanism. However, this benign presentation is materially contradicted by external threat intelligence: the domain is recorded as blacklisted, with multiple malicious detections, including detections from major security vendors. No separate identity contradiction or confirmed brand impersonation was identified, but the confirmed blacklist signal is sufficient to make account access, credential submission, payment, or other sensitive interaction inappropriate until the issue is independently resolved.

EVIDENCE

- The homepage presents BD Termoidraulica as an HVAC and plumbing provider offering local installation, maintenance, and repair services.
- External threat intelligence records the domain as blacklisted and reports 9 malicious detections.
- Domain registration telemetry records creation on 2015-10-23 and an age of 10.83 years.

Regulatory Verification Notes

The site provides local business information, contact details, service descriptions, and a certifications section, but the supplied content does not show a claimed license authority or license number. That is a regulatory-transparency gap requiring independent confirmation rather than standalone evidence of fraud. The apparent connection to a real local business is plausible but not independently verified to the standard required for sensitive commercial engagement; the external reputation contradiction therefore remains decisive.

EVIDENCE

- The homepage and service navigation identify BD Termoidraulica and describe residential and commercial HVAC, boiler, ventilation, and installation services.
- The site includes dedicated “Certificazioni” and “Contatti” pages, but no license authority or license number is identified in the supplied content.
- The site is hosted on AS31034, Aruba S.p.A., Italy.
- The transport certificate is DV, issued by Actalis Domain Validation Server CA G3, valid through 2027-03-31T04:06:57+00:00.

What to Verify Next

Before any sensitive interaction, an independent check should confirm the legal business identity and applicable Italian technical authorizations through official registries, using details obtained independently of the website where possible. The certifications should be matched to the issuing bodies, and the contact channels should be confirmed through an offline or independently sourced route. The external security detections should also be reviewed with the hosting provider or an appropriately qualified security team to determine whether they reflect compromise, malicious content, or a false positive.

EVIDENCE

- The certifications page provides the stated basis for checking professional credentials with the relevant issuing bodies.
- The contact page provides the business channels that should be compared with independently sourced records.
- The homepage identifies the geographic service area and business activities needed to scope an official registry check.

Summary Verdict

The overall posture is **critical trust risk** because confirmed external threat detections and blacklist status outweigh the site's otherwise ordinary local-business presentation. The website may correspond to a real

service business, but that apparent identity is not sufficient to support sensitive interaction while the reputation contradiction remains unresolved.

Infrastructure Integrity

The site is directly hosted through Aruba S.p.A. rather than behind a detected CDN or WAF, with two likely origin addresses identified. This provides ordinary hosting infrastructure but no additional edge-layer mitigation that would reduce exposure or establish legitimacy.

EVIDENCE

- Hosting infrastructure identifies Aruba S.p.A. as the provider, with AS31034 and two likely origin IP addresses.
- No CDN or WAF was detected; edge IP count was 0 and likely origin IP count was 2.

Closing Assessment

Access should remain limited to non-sensitive, read-only review until independent identity, authorization, and security-reputation checks produce a satisfactory resolution.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bdtermoidraulica.it.

- The request stayed on bdtermoidraulica.it. It was not redirected to another domain. CLEAR
- Registration is published under Aruba s.p.a.. CLEAR
- DNS for this domain is served by arubadns.cz. NOTED
- The registration is paid up to 2027-05-21. NOTED
- The earliest public archive of this site is from 2021-02-26. CLEAR
- It is hosted on ARUBA-ASN, from a server in IT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bdtermoidraulica.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
