

Is be-fit.pt a scam? TrustSniffer's high-risk assessment: 5/100

be-fit.pt

Verdict

5

OUT OF 100

CRITICAL RISK

be-fit.pt shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Portuguese-language corporate site for Be-Fit gym chain listing club locations, contact pages and a newsletter subscription. Contains standard privacy/cookie notices and no login or payment forms on the sampled page.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What be-fit.pt served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This is a Portuguese-language corporate website presenting the Be-Fit gym brand, a network of physical fitness clubs across numerous Portuguese locations, together with club information, contact routes, personal-training and training-plan services, and a newsletter subscription; its apparent business model is to promote gym memberships and related services.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional gym-chain website and the sampled page contains no login form, payment form, credential-harvesting mechanism, or explicit brand-impersonation indicator. However, this benign presentation is materially contradicted by confirmed external reputation findings: the domain is blacklisted, and multiple evaluated detections classify it as malicious or suspicious. The resulting risk is concentrated on sensitive interaction rather than the apparent fitness business model; public-facing content should not be treated as sufficient assurance for account, payment, or credential activity. No separate identity inconsistency or on-page impersonation signal was observed.

EVIDENCE

- The homepage presents the Be-Fit gym chain, club locations, membership-oriented branding, personal-training services, and a newsletter subscription.
- The sampled page contains one newsletter-subscription form and no login or sensitive payment form.
- External reputation evaluation recorded 5 malicious and 1 suspicious detections among 6 effective detections; a confirmed external blacklist hit was also recorded.
- Domain continuity is 16.22 years, with 33 archive snapshots spanning 2010-06-03 to 2025-09-27 and 16 years tracked.

Regulatory Verification Notes

The available material does not independently verify the real-world operator behind the website, and governance disclosures are unclear. The site presents a commercial gym and membership business but does not state a licensing authority or registration number in the supplied content; this is a transparency and verification gap, not by itself proof of misconduct. The site does include privacy and cookie notices, contact pages, and club-specific information, which supports a coherent public-facing business presentation. No third-party broker match was identified, but that absence is contextual only and does not resolve the external reputation contradiction.

EVIDENCE

- The visible site structure includes “About,” club-location, contact, FAQ, personal-trainer, and privacy-policy content.
- No license authority or license number is claimed in the supplied business-model information.
- Confirmed technical evidence identifies hosting on AS62416, PTServidor - SAMPLING LINE-SERVICOS E INTERNET, LDA, Portugal.
- The site uses a valid DV TLS certificate issued by YR1, valid to 2026-11-17.

What to Verify Next

Before any sensitive interaction, an independent route should confirm that the domain is the officially authorised web address for the Be-Fit club network, rather than relying solely on on-site branding. The relevant Portuguese corporate and consumer-protection records should be checked for the operating entity, membership terms, cancellation rights, and payment recipient. Any planned transaction should use a payment method with established dispute and recovery mechanisms, and official contact channels should be confirmed through an independently sourced club or corporate contact.

EVIDENCE

- The site publishes multiple physical club locations, allowing address and telephone details to be checked independently.
- The visible page directs visitors to contact, FAQ, privacy, and membership-related content rather than providing a clearly verified corporate identity record.
- The sampled form is limited to newsletter subscription and does not itself establish the legitimacy of future membership or payment workflows.

Summary Verdict

The overall posture is **critical trust risk** because confirmed external reputation contradictions outweigh the site's otherwise coherent, legitimate-looking presentation. The operator identity remains unverified, and the evidence does not support treating sensitive interaction with the domain as trustworthy.

Infrastructure Integrity

The site resolves directly to one likely origin address and has no detected CDN or WAF layer. Confirmed technical evidence places it on AS62416 operated by PTServidor - SAMPLING LINE-SERVICOS E INTERNET, LDA, in Portugal; the valid DV certificate issued by YR1 provides transport encryption but does not establish operator legitimacy.

Closing Assessment

Public informational browsing may be limited to the minimum necessary, but login, credential submission, payment, and other sensitive actions should be deferred until the domain, operator, and transaction arrangements have been independently confirmed.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- The structure of the page changed sharply while it was loading.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

Analysis engine signal:direct_threat

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of be-fit.pt.

- The request stayed on be-fit.pt. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2010-06-03. CLEAR
- It is hosted on PTServidor, from a server in PT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about be-fit.pt at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
