Full analysis

Overview

BeautyMall.ma is a Moroccan online parapharmacy and cosmetics retailer presenting branded skincare, makeup, haircare, sun-care, wellness, and baby-care products through a consumer ecommerce storefront. Its apparent business model is direct product sales supported by promotions, delivery services, customer support, and card-payment functionality.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent retail business model with extensive product listings, prices, discounts, gift bundles, delivery information, and customer-service messaging. Behavioral testing identified hidden forms and inline-script anomalies, but no external password-form destination, wallet-draining behavior, cloaking, phishing indicators, or malicious reputation findings; these are implementation-level observations rather than evidence of impersonation or fraud.

- Homepage: detailed Moroccan beauty and parapharmacy ecommerce catalog with product pricing, promotions, delivery, and payment messaging.
- Browser behavior: two hidden forms and two suspicious inline scripts were observed, with no wallet-connect, wallet-drainer, clipboard-hijacking, or cloaking activity.
- External reputation checks: zero malicious detections, zero suspicious detections, no blacklist hit, and zero abuse reports.

Regulatory Verification Notes

The site's identity and commercial presentation are consistent with an established consumer retailer. The domain is long-established, has sustained historical continuity, and maintains a clean external reputation and a top-tier global traffic footprint. The registration record identifies Weboss as the owner and ADK MEDIA as registrar. No specific license or registration number is claimed in the supplied evidence; this is a transparency item for ordinary business verification, not an identity contradiction.

- Domain registration: registered 2015-02-23; age 11.44 years; expiry 2027-02-23.
- Web archive: 89 snapshots spanning 2015-10-04 to 2026-05-14, covering 12 tracked years.
- Hosting: served from AS47583 (AS-HOSTINGER — Hostinger International Limited, CY).
- TLS: certificate issued by YE1, domain-validated (DV), valid to 2026-10-19.

What to Verify Next

For formal procurement or regulated distribution, independently confirm the seller’s corporate details and any applicable Moroccan commercial or health-sector authorization through the relevant registry. Before payment, confirm that checkout, delivery, returns, privacy, and customer-service terms are consistent with the stated merchant identity and retain transaction documentation.

- Homepage: identifies the business as a Moroccan parapharmacy and cosmetics retailer.
- Homepage: provides delivery, customer-service, promotional, and card-payment information requiring ordinary merchant due diligence.
- Privacy and cookie controls: published consent and data-use information is presented on the site.

Summary Verdict

The overall posture is established, legitimate, and trustworthy for normal interaction, including account login and standard ecommerce use. The convergence of site substance, continuity, technical validity, and clean reputation supports a confident trust conclusion.

Infrastructure Integrity

The site has no detected CDN or WAF layer; four resolved addresses were assessed as likely origin addresses. This means the infrastructure provides less edge-layer shielding than a CDN-fronted deployment, but it does not undermine the site’s established identity or legitimacy assessment.

Closing Assessment

Normal shopping, login, and account activity are appropriate; higher-value commercial engagements should follow standard vendor-onboarding and transaction-control procedures.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about beautymall.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
