

Is bebond.my a scam? TrustSniffer's high-risk assessment: 0/100

bebond.my

Verdict

0

OUT OF 100

CRITICAL RISK

bebond.my shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 75%.

What this site appears to be

Company site for BEBOND bonding agents and primers (product listings, brochure, retail locations) but the page includes large unrelated adult/SEO spam text, suggesting the site content has been compromised or injected with spam.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	4 flagged it VirusTotal	RISK

The page as captured

<https://bebond.my/>

What bebond.my served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

bebond.my presents itself as a Malaysian manufacturer and retailer of BEBOND bonding agents, primers, and construction additives, offering product information, brochures, and retail-location details for customers seeking building-material products.

Scam/Impersonation Risk

The site presents **critical interaction risk** because external security telemetry records a confirmed blacklist hit and multiple malicious detections. The homepage also combines its apparent construction-products purpose with extensive unrelated adult and search-engine-optimisation spam, indicating probable content compromise or injection; four suspicious inline scripts were also observed during technical inspection. No separate brand-impersonation finding or conflicting legal-entity identity was observed, but the confirmed blacklist contradiction is sufficient to make credential submission, account use, purchasing, and other sensitive interactions inappropriate. The contact and product claims should therefore not be treated as reliable until the site's integrity has been independently re-established.

EVIDENCE

- Domain registration: 2020-05-18; age 6.26 years.
- Web archive: 439 snapshots from 2020-10-27 through 2026-06-11, spanning 7 years tracked.
- External reputation telemetry: blacklist status confirmed by 2 sources; 4 malicious and 1 suspicious detections recorded.
- Homepage: adult and SEO spam text appears alongside the BEBOND corporate content; browser analysis recorded 4 suspicious inline scripts.

Regulatory Verification Notes

The apparent business identity is not independently verified by the available evidence. The product presentation does not state a licensing authority or license number, which is a regulatory-disclosure gap rather than, by itself, proof of fraud. The domain's registrar and organisational registration details provide administrative context, but they do not establish that the current website content or commercial activity is authorised by the named organisation.

EVIDENCE

- Homepage/product presentation: no licensing authority or license number is stated.
- Domain registration: registrar listed as Exabytes Network Sdn Bhd; organisation listed as Bondz Solution Sdn Bhd; registrant information is privacy-protected.
- Hosting telemetry: served from AS46015, EXABYTES-AS-AP - Exa Bytes Network Sdn.Bhd., MY.
- Transport encryption: TLS certificate issued by YR1, DV validation, valid to 2026-11-04.

What to Verify Next

Before any commercial engagement, an independent registry check should confirm the legal entity, operating status, and any sector-specific authorisation applicable to the products being sold. The website should be revalidated after the unrelated content has been removed, including a fresh review of its homepage, product brochures, retail-location information, and payment workflow. Official contact channels should be confirmed through an independently sourced business record or offline channel, and any transaction should use payment protections that permit dispute or recovery.

EVIDENCE

- Legal and product pages: independently confirm the stated business identity and applicable licensing or registration details.
- Homepage and technical behaviour: require a clean, consistent rendering without unrelated injected material before reliance.
- Contact and retail-location pages: corroborate the published business channels through an independent source.
- Checkout or order process: validate payment-protection and dispute mechanisms before a transaction.

Summary Verdict

The overall posture is critical, with the available evidence supporting a sensitive-interaction risk classification rather than a trustworthy engagement assessment. The website may reflect a genuine construction-products business, but its integrity and current operating identity are not sufficiently reliable for credentials, payments, or other consequential activity.

Infrastructure Integrity

The site resolves directly to a likely origin host on Exa Bytes infrastructure, with no detected CDN or WAF edge layer. This provides limited protective separation between the website and its hosting environment; valid domain-validated TLS mitigates transport interception concerns but does not establish content legitimacy.

Closing Assessment

Interaction should be restricted to passive observation while the site's content integrity, business identity, and relevant authorisations are independently confirmed; credentials, financial information, and transactions should not be submitted in the interim.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bebond.my.

- The request stayed on bebond.my. It was not redirected to another domain. CLEAR
- Registration is published under Exabytes Network Sdn Bhd. CLEAR
- DNS for this domain is served by s-mktg.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-18. NOTED
- The earliest public archive of this site is from 2020-10-27. CLEAR
- It is hosted on EXABYTES-AS-AP, from a server in MY. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bebond.my at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
