

Is beborderless.co.uk a scam? TrustSniffer's high-risk assessment: 5/100

beborderless.co.uk

Verdict

5

OUT OF 100

CRITICAL RISK

beborderless.co.uk shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal WordPress blog (theme: Optima) with default "Hello world!" post and basic site pages; no solicitations or financial features present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

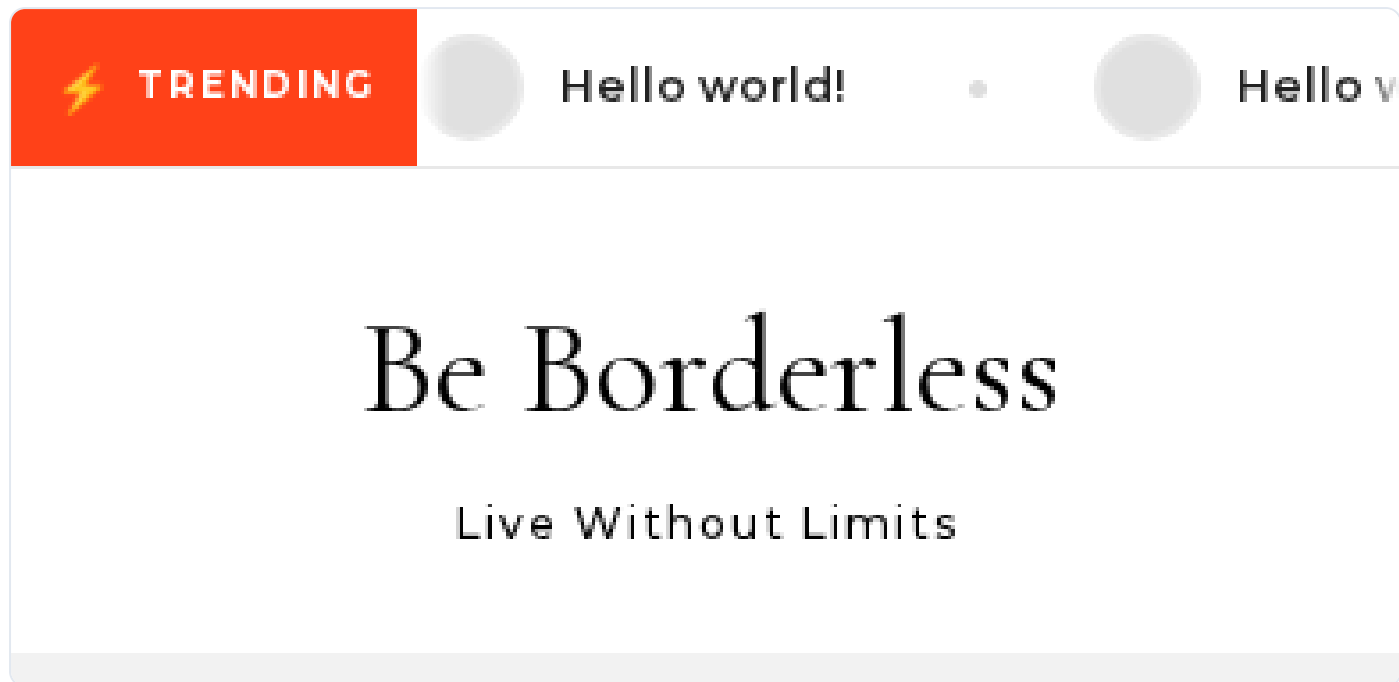

At a glance

The checks that decide most of this verdict.

Malware engines	6 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	3 months old Most scam domains are under a year old	RISK

Certificate	Encrypted connection Issued by YR2	NOTED

The page as captured

https://beborderless.co.uk/

What beborderless.co.uk served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is a minimal WordPress blog titled “Be Borderless – Live Without Limits,” presenting a default “Hello world!” article alongside basic Blog, About, Privacy Policy, Contact Us, and guest-post pages; its apparent purpose is informational or content-driven rather than transactional.

Scam/Impersonation Risk

The site has a **critical sensitive-interaction risk posture** because external threat intelligence recorded six malicious detections and confirmed blacklist presence across two sources. This is a material contradiction to the otherwise low-risk appearance of the homepage. The captured content itself shows no login form, credential-collection mechanism, financial solicitation, wallet connection, or clear brand impersonation, so the page-level evidence does not establish an active impersonation mechanism; however, those benign content characteristics do not offset the external reputation findings. Account access, credential submission, payment activity, and other sensitive interactions should therefore be treated as inappropriate.

EVIDENCE

- External reputation evaluation recorded `6` malicious detections, with `0` suspicious detections, and confirmed blacklist presence across `2` sources.
- The homepage contains a default “Hello world!” WordPress post and no visible login or sensitive-data form.
- Behavioral testing recorded `0` wallet-connect runs, `0` wallet-sensitive runs, `0` external POSTs, and `0` suspicious inline scripts.

Regulatory Verification Notes

The available About, Contact Us, Privacy Policy, and guest-post pages provide basic site navigation but do not present a clear legal entity, licensing authority, or registration number. The operator identity remains unverified, and the site's limited content does not establish whether any regulated activity is intended. This is a transparency and verification gap rather than a standalone finding of fraud. The absence of a broker-dataset match provides no positive regulatory conclusion.

EVIDENCE

- The site's visible page structure includes About, Contact Us, Privacy Policy, and Submit Guest Post pages, but the captured site content identifies only “Be Borderless” and “admin.”
- No license authority or license number is disclosed in the available business-model and page-content records.
- The domain was registered in `2026` and is recorded as approximately `0.29` years old through Namecheap, Inc. t/a Spaceship.
- The TLS certificate is Domain Validated (DV), issued by `YR2`, and valid until `2026-10-10T03:34:41+00:00`.

What to Verify Next

Before any sensitive interaction, an institution should independently establish the responsible legal entity and confirm any claimed authorization directly with the relevant UK or other applicable regulatory register. Contact details should be validated through an independently sourced channel rather than relying solely on the website. Any proposed commercial relationship should also require documented ownership, contractual terms, payment protections, and a clear dispute process.

EVIDENCE

- The captured homepage is a low-content WordPress installation with `818` characters of visible text and a default first post, leaving limited substantive material for business verification.
- The site has no visible sensitive forms, external destinations, or financial features in the captured interaction surface.
- Independent identity and regulatory checks are necessary because the available pages do not provide a clear operator or authorization trail.

Summary Verdict

The overall posture is **critical risk for sensitive interaction**. The site's benign informational presentation is materially outweighed by confirmed external threat detections and blacklist findings, while the real-world operator identity remains unverified. Passive observation is distinguishable from trust in the site for credentials, accounts, payments, or other consequential activity.

Infrastructure Integrity

The domain resolves directly to infrastructure operated by Namecheap, Inc. in the United States, with no CDN or WAF detected and no separate edge-IP layer identified. This provides a concrete hosting attribution but is not evidence of operator legitimacy or safety.

EVIDENCE

- Hosted on `AS22612` — `NAMECHEAP-NET - Namecheap, Inc., US`.
- Infrastructure records show `1` unique IP, `0` edge IPs, and `has\_cdn: false`.
- The resolved server IP is `66.29.148.161`, registered through ARIN.

Closing Assessment

Sensitive interaction should be withheld, and any business, payment, or credential-related engagement should proceed only after independent identity, authorization, and contact-channel validation has been completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of beborderless.co.uk.

- The request stayed on beborderless.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under Namecheap, Inc. t/a Spaceship. CLEAR
- DNS for this domain is served by net., across 2 name servers. NOTED
- The registration is paid up to 2027-05-05. NOTED
- The earliest public archive of this site is from 2021-11-26. CLEAR
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about beborderless.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
