

Is bechdy.com safe? TrustSniffer's moderate-trust assessment: 70/100

bechdy.com

Verdict

70

OUT OF 100

MODERATE TRUST

bechdy.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Not Scam

Governance Risk

Dynamic Interaction Caution

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Minimal coming-soon landing page (Bechdy) promoting an AI site builder, offering 50 free credits and collecting email signups. Protected by Google reCAPTCHA and includes cookie consent.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

BECHDY

What bechdy.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2020.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Bechdy.com is a coming-soon landing site for “Airo AI Builder,” presenting a service intended to take an idea to a live website in minutes, offering 50 free credits and collecting email signups for launch updates, promotions, and related marketing.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting-identity indicators were observed, and the landing page contains no login, password, wallet, or payment form. The published business concept is limited to an AI site-building service and email lead capture, with no clear deception indicators in the page content. A separate reputation signal consists of 13 abuse reports associated with a shared Amazon content-delivery IP; because the reports apply to shared infrastructure rather than specifically to Bechdy.com, they provide contextual caution but do not establish malicious conduct by this site.

EVIDENCE

- Landing page: no login form, hidden form, wallet interaction, or sensitive credential field was detected.
- Landing page: brand-impersonation analysis found no suspected impersonated brand and no content red flags.
- Domain registration record: registered 2024-10-18, approximately 1.84 years old.
- Web-archive record: 17 snapshots spanning 2020–2025, with 6 years tracked.

Regulatory Verification Notes

The available evidence supports a moderate, apparently legitimate presentation but does not independently verify the real-world operator. The landing page references Privacy Policy and Terms of Service and displays a copyright notice for Bechdy, yet it does not present a clearly identified legal entity, regulatory status, or license number. That is a transparency matter appropriate for confirmation if the service later introduces paid subscriptions, business accounts, or other obligations. Registration is through GoDaddy.com, LLC, while the published privacy and terms references provide only limited information about accountability.

EVIDENCE

- Landing page footer and reCAPTCHA notice: Privacy Policy and Terms of Service are referenced, alongside “Copyright © 2025 Bechdy.”
- Landing page: no license authority or license number is claimed in the available business-model content.
- Hosting telemetry: served from AS16509, Amazon.com, Inc.
- Transport security: TLS certificate issued by GoDaddy TLS Intermediate CA DV - R1v1, validation level DV, valid to 2027-03-03.

What to Verify Next

Before any paid subscription, materially sensitive data submission, or reliance on a launched service, confirm the operating entity, billing identity, applicable terms, refund arrangements, and data-processing practices through the site’s final legal materials. Confirm official support and contact channels independently, and where a regulated activity is introduced, check the relevant licensing registry using the legal entity and jurisdiction stated by the operator.

EVIDENCE

- Current landing page: service status is “Launching Soon,” so final commercial and legal arrangements may not yet be available.
- Email-signup form: provides a basis to confirm consent, retention, promotional-use, and deletion terms before enrollment.
- Terms and Privacy references: should be reviewed in their complete form when the service becomes operational.

Summary Verdict

Bechdy.com presents a **moderate-trust, not-scam posture** with no observed contradiction linking it to phishing, impersonation, or malicious activity. Its apparent legitimacy is consistent with the available evidence, but the operator's real-world identity remains unverified and the site is still at an early launch stage.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure using Amazon edge servers, and the origin server was not observable in the analysis. This reduces direct exposure of the underlying host and is a mitigating control, but it is not independent proof of operator legitimacy.

EVIDENCE

- Hosting infrastructure: two observed addresses were identified as CDN edge servers, with no likely origin candidate.
- CDN/WAF posture: the site's observed traffic was handled through Amazon infrastructure in the United States.

Closing Assessment

Ordinary informational browsing and limited signup activity are proportionate at this stage; higher-value commitments should wait until the operating entity, commercial terms, and data practices are clearly established.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Dynamic Interaction Caution

- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

Signals weighed against the site

- AbuseIPDB: 13 reports on hosting IP 76.223.105.230 (Amazon.com, Inc., Content Delivery Network), 26% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bechdy.com.

- The request stayed on bechdy.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-18. NOTED
- The earliest public archive of this site is from 2020-11-12. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bechdy.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
