Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the corporate site of PT Baracipta Esa Engineering, presenting construction and engineering services alongside paid BIM and technical training courses, project portfolios, testimonials, course pricing, and visitor contact options. Its apparent business model is based on engineering and construction engagements together with education and training fees.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other contradictory signals were observed. The homepage and business pages describe a conventional engineering and construction company, including construction services, BIM education, project portfolios, mentors, and a "Talent Hub," rather than a financial scheme or credential-harvesting service. The site also presents ordinary business contact details and does not contain a login form, sensitive submission form, wallet connection, or cryptocurrency functionality. Available external reputation checks found no malicious or suspicious detections, although coverage was partial.

EVIDENCE

- The homepage identifies “PT Baracipta Esa Engineering” and describes construction services, BIM training, portfolios, mentors, and company-placement support.
- The site's contact and service content presents an address, telephone contact, email, and WhatsApp channel for ordinary business engagement.
- The site's transport and domain records show registration on 2014-04-11, with an age of 12.37 years.
- Historical continuity is recorded from 2015-08-01 through 2026-04-22, covering 12 years tracked.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate small engineering and training business, but the real-world operator identity is not independently verified. The Profile/About and service pages name PT Baracipta Esa Engineering and describe its commercial activities; however, the reviewed content does not state a licensing authority or license number. That is a regulatory-disclosure point for confirmation where a particular engineering, construction, or training authorization is required, not evidence of impersonation. The available broker-reputation context contains no match, and no identity contradiction was observed.

EVIDENCE

- The site's Profile/About content states that PT Baracipta Esa Engineering provides engineering services based on innovation and creativity.
- The site is served through AS47583, identified as AS-HOSTINGER – Hostinger International Limited, CY.
- The site's TLS certificate is issued by YR1, uses DV validation, and is valid to 2026-10-09T11:19:41+00:00.
- Domain registration records identify PT JC Indonesia as registrar, with an expiration date of 2028-04-11T23:59:59Z.

What to Verify Next

Before credential or payment interactions, an interested party should independently confirm the company's legal identity and contact channels through an official business registry or an offline contact route. Course purchasers should review the applicable enrollment, cancellation, refund, and payment-protection terms. Where the proposed engineering or construction engagement requires authorization, the relevant Indonesian registry should be checked for the applicable professional or business licensing status.

EVIDENCE

- The site's Contact page provides multiple contact methods suitable for an independent confirmation.
- The Course pages provide the stated training offerings and pricing that should be reconciled with the commercial terms supplied before payment.
- The site's Portfolio and About content provides the project and business claims that can be matched against independently obtained contracting records.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence consistent with an established, apparently legitimate business website. No scam or impersonation contradiction was identified, but the operator’s real-world identity remains unverified, so legitimacy should be treated as apparent rather than proven.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, which mitigates direct exposure of the web service and is a positive defensive signal, although protective hosting does not independently establish the operator’s identity. The observed address was treated as a CDN edge address, and no origin candidate was observed.

EVIDENCE

- Cloudflare was detected as the CDN/WAF provider.
- One edge IP address was observed, with zero likely origin IP candidates.
- The infrastructure resolved consistently during the analysis.

Closing Assessment

Normal browsing is proportionate to the assessed posture; credential or payment activity should proceed after the ordinary independent business, commercial-terms, and payment-protection checks described above.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of beecons.co.id.

- The request stayed on beecons.co.id. It was not redirected to another domain. CLEAR
- Registration is published under PT JC Indonesia. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-04-11. CLEAR
- The earliest public archive of this site is from 2015-08-01. CLEAR
- It is hosted on AS-HOSTINGER, from a server in LT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about beecons.co.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
