

Is behsazangroup.com a scam? TrustSniffer's high-risk assessment:
0/100

behsazangroup.com

Verdict

0

OUT OF 100

CRITICAL RISK

behsazangroup.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Persian-language corporate website for Behsazan Energy Sazeh, an engineering and construction firm offering HVAC, design, project execution, equipment supply, and maintenance. Displays projects, contact details, and partner links.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://www.behsazangroup.com/>

What behsazangroup.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2004.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Behsazan Energy Sazeh is a Persian-language corporate website presenting an engineering and construction business focused on HVAC and infrastructure services, including design, consultation, project execution, equipment supply, and maintenance, supported by project listings, company information, and contact facilities.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional engineering contractor: the homepage describes project-based services and displays examples such as a 588-unit housing project, a polymer factory, a hospital, and municipal infrastructure work. It also contains no detected phishing form, wallet-connect function, crypto content, or explicit brand-impersonation indicator. Nevertheless, this benign page presentation is outweighed by a material external contradiction: the domain is confirmed as blacklisted, with seven malicious detections and a Tier-1 threat detection attributed to Fortinet. The available evidence therefore supports a clearly cautionary assessment for sensitive interaction, despite the absence of phishing or impersonation signals in the page content itself.

EVIDENCE

- The homepage identifies Behsazan Energy Sazeh and presents HVAC, design, execution, equipment-supply, maintenance, and project-portfolio content.
- External reputation checks recorded 7 malicious detections and a Fortinet Tier-1 threat detection.
- The domain is confirmed blacklisted by two listed sources; Google Safe Browsing was not flagged.

Regulatory Verification Notes

The About page states that the company was established in 1380 and describes work across national, hospital, commercial, industrial, educational, sports, water, and residential projects. Those on-site statements provide business context but do not independently verify the real-world operator, which remains unverified. The reviewed pages do not present a license authority or license number; this is a regulatory-transparency gap requiring independent confirmation, not by itself proof of fraud. The domain uses a reputable registrar, but registration administration does not establish licensing or operational legitimacy.

EVIDENCE

- The About page states that Behsazan Energy Sazeh was established in 1380 and describes its engineering and construction activities.
- The domain was registered on 2016-09-24 and is approximately 9.91 years old.
- The domain registrar is 1API GmbH.
- The site's TLS certificate is issued by YR1, uses DV validation, and is valid until 2026-09-20.

What to Verify Next

Before any account, credential, payment, contract, or document exchange, an independent party should confirm the operator's legal identity and relevant business or engineering authorization through the applicable official registry. Contact details should be validated through an independently sourced telephone number or offline business record rather than relying solely on the website. Any proposed project, equipment transaction, or maintenance engagement should also be confirmed directly with the named counterparty using independently obtained records.

EVIDENCE

- The About page supplies the corporate name and establishment claim that should be matched against an official business record.
- The Services and Projects pages describe contract-relevant activities that should be checked against independently verified counterparties.
- The site exposes Contact, Login, and Register navigation, while automated inspection found no submitted login form or sensitive form destination.

Summary Verdict

The overall posture is **critical trust risk**. Apparent corporate substance on the website does not overcome the confirmed external threat and blacklisting contradictions, and the available evidence does not independently

verify the operator’s identity. Sensitive interaction should therefore be treated as unsuitable pending authoritative resolution of the external detections.

Infrastructure Integrity

The site resolves directly to infrastructure operated by PARVASYSTEM - Vandad Vira Hooman LLC in Iran, without a detected CDN or WAF edge layer; this provides limited separation between the service and its hosting environment. The valid TLS deployment protects transport confidentiality but is only a mitigating technical control and does not establish legitimacy.

EVIDENCE

- Hosted on AS60631 (PARVASYSTEM - Vandad Vira Hooman LLC, IR).
- The resolved server IP is 185.8.172.169 in Iran.
- Infrastructure analysis identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- TLS validation is DV; the issuer is YR1 and the certificate expires on 2026-09-20.

Closing Assessment

Sensitive actions should remain suspended unless the external detections are independently explained and the operator’s legal and regulatory standing is confirmed through authoritative channels. Until then, the site should not be used for credential submission, financial activity, or exchange of sensitive business documentation.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of behsazangroup.com.

- The request stayed on behsazangroup.com. It was not redirected to another domain. CLEAR
- Registration is published under 1API GmbH. CLEAR
- DNS for this domain is served by tashilgostar.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-24. NOTED
- The earliest public archive of this site is from 2004-03-23. CLEAR
- It is hosted on PARVASYSTEM, from a server in IR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about behsazangroup.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
