Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1998.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

北京市人民政府门户网站 is a municipal government portal presenting public news, policy information, government disclosures, citizen and business services, multilingual access, and a user-login area for personalized services; its apparent purpose is to provide official civic information and access to public-sector services rather than commercial transactions.

Scam/Impersonation Risk

No contradictions were observed. The homepage identifies itself as the Beijing municipal government portal and presents a coherent government-service model, including policy publication, public-service access, citizen interaction, and a login function without observed phishing, brand-impersonation, malicious-content, or suspicious-transaction indicators. The site's long and continuous presence, combined with clean external reputation findings and established public visibility, is consistent with an established website. The real-world operator identity remains independently unverified, so the on-page institutional identity should be treated as apparent rather than conclusively proven.

EVIDENCE

- The homepage title and visible content identify a Beijing municipal government portal with government news, policy disclosure, citizen services, business services, and public interaction features.
- Domain registration evidence records creation on 1998-06-09, making the domain approximately 28.2 years old.
- Historical records show 5,000 archive snapshots spanning 1998–2025, covering 28 tracked years.
- External reputation checks recorded zero malicious and zero suspicious detections, with no phishing or blacklist finding.

Regulatory Verification Notes

The site's stated function is civic administration and public-service delivery, not a commercial or financial offering; consequently, the relevant verification question is institutional authenticity rather than a commercial operating license. The homepage provides substantial governmental content and service categorization, but the available evidence does not independently establish the legal operator behind the domain. The use of the sovereign government domain suffix and the site's established content profile support apparent legitimacy, while the identity connection should remain qualified. No third-party broker match or adverse broker-reputation signal was identified.

EVIDENCE

- The homepage contains dedicated sections for government disclosure, policy services, personal services, corporate services, investment projects, and public complaints or consultations.
- The site is served from AS24547, identified as CMNET-V4HEBEI-AS-AP / Hebei Mobile Communication Company Limited, CN.
- The transport certificate is OV-validated, issued by Xcc Trust OV SSL CA to 首都之窗运行管理中心, and valid through 2026-10-15.
- The site uses the government-oriented `gov.cn` domain suffix; no commercial license or regulated financial-service claim is presented in the supplied page content.

What to Verify Next

Before credential or other sensitive interactions, an institution should independently confirm that the domain is the intended official Beijing government service endpoint through a trusted government directory or an offline institutional contact route. The login flow should be reached from the confirmed official homepage, and any service-specific payment, identity-document, or authorization request should be checked against the applicable government service instructions and official payment protections. Where a transaction or account action is delegated to another service, its separate legal identity and terms should be reviewed rather than inferred solely from the portal's branding.

EVIDENCE

- The homepage contains one login form for personalized services and does not direct that form to an untrusted destination.
- The homepage provides separate personal-service, corporate-service, and public-interaction pathways that can be matched against the relevant official service requirement.
- Behavioral testing observed no external posts, no external XHR or fetch activity, no hidden forms, and no wallet-related activity.
- The page remained successfully accessible across 2 successful test runs.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate government website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-conflict indicators were observed, although independent verification of the real-world operator remains outstanding.

Infrastructure Integrity

The site has no detected CDN or WAF layer, and the resolved infrastructure includes two likely origin addresses rather than identified edge addresses. This direct hosting arrangement is not itself evidence of maliciousness, but it provides less intermediary protection than a mainstream CDN/WAF deployment and should be regarded as a limited infrastructure consideration.

Closing Assessment

Ordinary browsing and routine service use are proportionate to the assessed posture; credential submission or any payment-related action should follow the ordinary independent institutional, service-specific, and payment-

protection checks described above.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of beijing.gov.cn.

- The request stayed on beijing.gov.cn. It was not redirected to another domain. CLEAR
- Registration is published under 北京首信网创网络信息服务有限责任公司. CLEAR
- DNS for this domain is served by cdns.cn, across 3 name servers. NOTED
- The registration is paid up to 2027-06-09. NOTED
- The earliest public archive of this site is from 1998-12-12. CLEAR
- It is hosted on CMNET-V4HEBEI-AS-AP, from a server in CN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about beijing.gov.cn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
