- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

BeInCrypto is an established crypto news and information website presenting market coverage, regulation, DeFi, trading, security, technology, education, events, and industry analysis; its apparent business model is media publishing supported by advertising, sponsored content, affiliate promotions, newsletters, and related products.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence. The homepage operates as an editorial publication, offering news, market prices, educational material, a portfolio watchlist, and coverage of assets including Bitcoin, Ethereum, Solana, XRP, BNB, Dogecoin, Cardano, Pi Coin, and Toncoin rather than soliciting deposits or promising returns. The site showed no impersonation, phishing, malicious-content, or sensitive-form indicators, supporting a legitimate and established identity.

- Homepage: Identified as “Unbiased Crypto News - BeInCrypto,” with substantial editorial coverage and no login or sensitive submission form.
- Homepage: Business activity is centered on publishing, market information, education, newsletters, advertising, sponsored content, and affiliate-style promotions.
- Domain registration: Registered 2017-09-07 and approximately 8.9 years old.
- Web archive: 5,000 snapshots spanning 2018-03-21 to 2024-09-17, covering 7 years.

Regulatory Verification Notes

The site presents itself as a media and information publisher rather than a deposit-taking or return-promising financial service. Disclosure pages and advertising or sponsored-content notices are present, although the supplied evidence does not establish a financial-services license or regulatory authorization; this is a limited transparency matter requiring contextual verification, not evidence of deception. Registration through GoDaddy.com, LLC is consistent with ordinary commercial web operations, while private registration is an administrative detail. The available reputation signals are clean, and no broker-related match was identified.

- Registration records: Registrar identified as GoDaddy.com, LLC; expiration is 2027-09-07.
- Hosting infrastructure: Served from AS13335 (Cloudflare).
- Transport security: TLS certificate issued by WE1, using DV validation, valid to 2026-09-09.
- Homepage: Advertising, sponsored-partner, and affiliate-style disclosures are identified.

What to Verify Next

For institutional use, confirm whether any specific sponsored recommendation or commercial promotion is subject to disclosure or licensing requirements in the relevant jurisdiction, and distinguish editorial analysis from partner content before relying on it for regulated decision-making. Official support and contact channels should be confirmed through the site’s published disclosure and contact materials.

- Homepage: Contains sponsored partner content and affiliate-style exchange promotions.
- Homepage: Offers newsletters, events, market data, and related media products alongside editorial coverage.
- Homepage: Provides links to established social channels including YouTube, X/Twitter, LinkedIn, Instagram, and Telegram.

Summary Verdict

BeInCrypto presents as a legitimate, established, and trustworthy crypto-media publication with a coherent editorial business model and no observed scam or impersonation contradictions. The overall posture supports normal interaction, including account login and standard use.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a standard mitigating layer, and the observed addresses were CDN edge infrastructure rather than directly exposed origin hosts. This supports resilience and reduces direct origin exposure, but remains an infrastructure control rather than proof of legitimacy.

Closing Assessment

Normal browsing, account login, and standard interaction are appropriate; sponsored and affiliate material should be assessed according to the relevant business or investment decision.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of beincrypto.com.

- The request stayed on beincrypto.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR

- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-07. NOTED
- The earliest public archive of this site is from 2018-03-21. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about beincrypto.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
