

Is beltelecom.by legit? TrustSniffer's high-trust assessment: 100/100

beltelecom.by

Verdict

100

OUT OF 100

HIGH TRUST

beltelecom.by appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 75%.

What this site appears to be

Russian-language home page for Belarusian state telecommunications operator Белтелеком, presenting consumer and business connectivity services, hosting, support, payments, company information, legal policies, and current news.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1998.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the Russian-language corporate service portal of Belarusian telecommunications operator Белтелеком, presenting consumer and business internet, television, telephone, hosting, cloud, support, payment, equipment, company-information, legal-policy, and news services through a subscription-based infrastructure business model.

Scam/Impersonation Risk

No contradictions, phishing indicators, impersonation signals, or confirmed blacklist findings were observed. The homepage's coherent corporate presentation, extensive service navigation, customer-support functions, and absence of sensitive or externally directed login forms are consistent with an established telecommunications operator. External reputation checks found no malicious or suspicious detections, and the domain's long, continuous history is aligned with its current identity.

- The homepage identifies Белтелеком and provides structured consumer, business, support, payment, company, legal, and news sections.
- External reputation checks recorded zero malicious detections, zero suspicious detections, and no blacklist match.
- The domain registration record identifies Белтелеком as the organization and shows registration on 2002-09-20 (~23.88 years old).
- Archive records contain 1,835 snapshots spanning 1998–2026, with 29 years tracked.

Regulatory Verification Notes

The site provides company information, legal policies, service procedures, tariffs, support channels, and administrative-procedure content. The reviewed pages do not present a specific license number or independently verified regulatory status; this is a limited disclosure point for formal due diligence, not evidence of deception. The available identity and infrastructure signals nevertheless support a legitimate, established operating entity.

- The company-information and legal-policy areas provide substantive organizational and service-governance content.
- Hosted on AS6697, BELPAK-AS - Republican Unitary Telecommunication Enterprise Beltelecom, BY.
- TLS uses GlobalSign GCC R6 AlphaSSL CA 2025, DV validation, valid through 2027-01-05.

What to Verify Next

For regulated procurement or materially significant engagements, confirm the applicable telecommunications authorization directly with the relevant Belarusian registry and validate official support channels through an independently obtained corporate contact route.

- The site exposes company-information, legal-policy, administrative-procedure, and support pages for due-diligence review.
- The homepage provides customer-support, payment, and account-service pathways that can be cross-checked against independently sourced organizational records.

Summary Verdict

The website presents a legitimate, established, and trustworthy posture, with strong convergence between its corporate content, historical continuity, technical identity, and clean external reputation. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to infrastructure associated with AS6697 and Beltelecom in Belarus, with no CDN or WAF identified and two likely origin addresses observed. This provides clear hosting attribution and reduces ambiguity about the serving network, while the valid GlobalSign TLS certificate protects transport security.

Closing Assessment

Normal account use and standard transactions are appropriate, subject to the prospective user’s ordinary organizational controls for consequential services or payments.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of beltelecom.by.

- The request stayed on beltelecom.by. It was not redirected to another domain. CLEAR
- Registration is published under Open Contact, Ltd. CLEAR
- DNS for this domain is served by belpak.by, across 2 name servers. NOTED
- The registration is paid up to 2026-10-01. NOTED
- The earliest public archive of this site is from 1998-12-12. CLEAR
- It is hosted on BELPAK-AS, from a server in BY. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about beltelecom.by at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
