

Is benchmarkitservices.com legit? TrustSniffer's high-trust assessment: 100/100

benchmarkitservices.com

Verdict

100

OUT OF 100

HIGH TRUST

benchmarkitservices.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Public website for Benchmark IT Services, an Australian managed IT and cyber security provider. The page contains service descriptions, locations, contact information, testimonials, FAQs and a call-to-action to book a free IT audit. No login, payment flows, or financial investment claims are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What benchmarkitservices.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Benchmark IT Services is an Australian corporate website presenting managed IT, cyber security, cloud, artificial-intelligence, consulting, backup, and recovery services for small and medium-sized businesses in Melbourne, with a business model based on service contracts, consulting engagements, managed support subscriptions, and invitations to book a free IT audit.

Scam/Impersonation Risk

No contradictions were observed. The public content is consistent with a conventional managed-IT consultancy: it contains service information, locations, contact details, testimonials, FAQs, and no investment, cryptocurrency, payment, or account-login proposition. Automated interaction testing also found no phishing indicators, hidden forms, wallet activity, suspicious scripts, cloaking, or abnormal external network activity. External reputation checks recorded no malicious or suspicious detections, and no brand-impersonation signal was identified. The site therefore presents a low apparent scam or impersonation risk, while the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- Homepage: presents a corporate managed-IT-services profile with no login form, payment flow, financial-investment claim, or cryptocurrency feature.
- Homepage behavior: 2 successful test runs, 0 external XHR/fetch requests, 0 hidden forms, 0 wallet-connect runs, and 0 suspicious inline scripts.
- External reputation telemetry: malicious detections 0, suspicious detections 0, abuse reports 0, and confirmed threat-list flag false.

Regulatory Verification Notes

The site's public material describes commercial IT and cyber-security services but does not state a sector-specific license or registration number. For this business model, that is a transparency item requiring ordinary commercial verification rather than evidence of deception. The apparent corporate presentation, long-established domain registration, valid transport encryption, identifiable hosting, and clean external reputation are consistent with an established website. Registration privacy through the named registrar is an administrative detail and does not create an identity contradiction. No third-party regulated-entity status was established by the supplied evidence.

EVIDENCE

- Domain registration: created 2011-06-09 and recorded as 15.21 years old; registrar GoDaddy.com, LLC; expiration 2028-06-09.
- Hosting: served from AS47583, AS-HOSTINGER — Hostinger International Limited, CY; server country CY.
- Transport encryption: TLS certificate issued by YR1 at DV validation level, valid to 2026-10-05.
- Public business pages: service, contact/location, testimonial, and FAQ content are present, but no sector-specific license or registration number is stated.

What to Verify Next

Before a commercial engagement, independently confirm the contracting entity and published office details through an Australian corporate or business registry and, where material, through an offline contact route. Obtain written terms identifying the service provider, scope of work, fees, renewal and cancellation conditions, data-handling responsibilities, and dispute arrangements. For any service involving regulated customer data or sector-specific obligations, confirm the relevant qualifications, authorizations, and insurance directly with the provider.

EVIDENCE

- Homepage: includes a call to book a free IT audit, creating a clear point at which the proposed contracting entity and engagement terms should be documented.
- Public site content: includes FAQs, testimonials, contact information, and office locations that can be compared with independently obtained business details.
- Identity assessment: the available evidence connects the website to a real-world operator only on a likely, not independently verified, basis.

Summary Verdict

The overall posture is high trust and low risk, and the available evidence is consistent with an established, apparently legitimate website. No scam, phishing, impersonation, or identity contradiction was identified, although operator identity should not be treated as independently proven.

Infrastructure Integrity

The site resolves directly to a single origin address rather than through a detected CDN or WAF edge, with no separate edge-IP layer identified. Direct hosting provides less architectural shielding than a reverse-proxied deployment, but the identified hosting arrangement and valid TLS support stable and technically coherent delivery; protective infrastructure is treated as a mitigating signal only, not proof of legitimacy.

EVIDENCE

- Infrastructure resolution: unique IP count 1, edge IP count 0, and likely origin IP count 1.
- Hosting artifact: resolved status, registry RIPE NCC, and hosting country CY.
- TLS artifact: DV certificate issuer YR1 with validity ending 2026-10-05.

Closing Assessment

Ordinary browsing and evaluation are proportionate to the assessed posture; before credentials or payment information are exchanged, the prospective customer should complete the independent contracting-entity, terms, and payment-protection checks described above.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of benchmarkitservices.com.

- The request stayed on benchmarkitservices.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2028-06-09. CLEAR
- The earliest public archive of this site is from 2013-04-16. CLEAR

- It is hosted on AS-HOSTINGER, from a server in CY. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about benchmarkitservices.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
