

Is benzahosting.cl legit? TrustSniffer's high-trust assessment: 80/100

benzahosting.cl

Verdict

80

OUT OF 100

HIGH TRUST

benzahosting.cl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Marketing and product pages for a Chile-based hosting provider offering shared hosting, professional SSD plans, VPS, dedicated servers, domain registration and email services, with pricing, features and contact emails listed.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

BenzaHosting is a Chile-focused commercial hosting and domain-services website presenting shared and SSD hosting, VPS and dedicated servers, domain registration, business email, and related productivity services. Its apparent business model is recurring subscription sales for infrastructure and associated digital services, supported by product pricing, promotions, technical assistance, and customer-account functions.

Scam/Impersonation Risk

No contradictions were observed across the available evidence: there was no detected phishing, impersonation, malicious-content, or conflicting-identity signal. The site's commercial presentation is coherent with a hosting provider, its domain has maintained continuous historical presence, and external reputation telemetry was clean. The real-world operator remains independently unverified, so the evidence supports an apparently legitimate established site rather than proving the operator's identity.

EVIDENCE

- The homepage and service catalogue present a consistent hosting business model covering shared hosting, SSD hosting, VPS, dedicated servers, domains, and related email services.
- Domain registration telemetry records registration on 2009-04-01, an age of 17.38 years, through NIC Chile.
- Archive telemetry records 202 snapshots spanning 2009-06-24 to 2026-06-08, covering 18 tracked years with a maximum gap of 1 year.
- External reputation telemetry recorded 0 malicious detections, 0 suspicious detections, and a global traffic rank of 50540.

Regulatory Verification Notes

The commercial pages describe hosting, domain registration, email, Google Workspace, and Office 365 services, with pricing and support channels. No licensing claim or license number is presented in the reviewed material; for this type of service, that is a disclosure point to clarify rather than evidence of deception. The available evidence is consistent with an established commercial provider, while independently connecting the website to a verified legal operator remains unresolved.

EVIDENCE

- Product pages present recurring hosting plans, VPS and dedicated-server offerings, domain registration, and business-email services.
- The homepage identifies a Chile-based datacenter proposition, advertises “99% Uptime,” and provides technical and commercial support paths.
- The site is served from AS263753 — SERVICIOS DE DATACENTER DATANETWORKS LIMITADA, CL.
- The transport certificate is issued by YR1 at DV validation level and is valid to 2026-11-07.

What to Verify Next

Before credential or payment interaction, independently confirm the operating entity and its relationship to the advertised domain through a reliable offline or registry-based channel. Review renewal, cancellation, refund, service-level, and data-handling terms, and confirm that the selected payment method provides appropriate transaction protection. Where the service arrangement requires a regulated registration or sector-specific authorization, confirm that status directly with the relevant authority.

EVIDENCE

- The homepage provides an “Area de Cliente” and separate technical and commercial assistance paths, creating identifiable channels for independent confirmation.
- The commercial pages expose service pricing, promotions, and product features that can be compared with the terms governing subscription and renewal.
- The reviewed page analysis found no login form, hidden form, password-external form, wallet connection, or other sensitive interaction mechanism.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust and low-risk posture. Its coherent service model, sustained presence, clean external reputation, and stable technical presentation support normal website use, subject to ordinary independent checks before credentials or payments are submitted because operator identity is not independently verified.

Infrastructure Integrity

The site resolves directly to hosting infrastructure without a detected CDN or WAF layer, and no edge-network protection was identified. This is a neutral infrastructure characteristic rather than an indication of malicious activity; the observed hosting arrangement provides a straightforward, attributable technical endpoint but offers fewer intermediary protection layers.

EVIDENCE

- DNS resolution identified 1 unique address and 1 likely origin address.
- The resolved address is 131.72.236.4.
- No CDN vendor or edge IP was detected.

Closing Assessment

Ordinary browsing and evaluation are proportionate to the current evidence. Before account creation, payment, or submission of business information, complete the independent entity, service-term, and payment-protection checks described above.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of benzahosting.cl.

- The request stayed on benzahosting.cl. It was not redirected to another domain. CLEAR
- Registration is published under NIC Chile. CLEAR
- DNS for this domain is served by 236.10), across 4 name servers. NOTED
- The registration is paid up to 2027-04-30. NOTED
- The earliest public archive of this site is from 2009-06-24. CLEAR
- It is hosted on AS263753, from a server in CL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about benzahosting.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
