

Is benztechsolutions.com a scam? TrustSniffer's high-risk assessment: 0/100

benztechsolutions.com

Verdict

0

OUT OF 100

CRITICAL RISK

benztechsolutions.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal 'Good Things are Coming' placeholder page (benztechsolutions.com) with no product, contact, forms, or links.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	11 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	3 months old Most scam domains are under a year old	RISK
Web archive	Archived since 2013 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YR2	NOTED

The page as captured

<https://benztechsolutions.com/>

What benztechsolutions.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

benztechsolutions.com is a bare coming-soon landing page presenting the messages “Good Things are Coming” and “We are currently working on something awesome,” with an apparent purpose of announcing a future website rather than offering an active product or service.

Scam/Impersonation Risk

Confirmed external threat contradictions make this domain unsuitable for sensitive interaction. Multiple external security assessments identify malicious activity and a blacklist status, including detections from two tier-one security vendors. The benign appearance of the homepage does not offset those findings. No distinct legal-entity conflict or brand-impersonation signal is present in the supplied page content, but the current operator remains unverified and the external detections are sufficient to establish a material security concern.

EVIDENCE

- External reputation telemetry recorded 11 malicious detections from 16 evaluated results, with Fortinet and Sophos among the tier-one vendors reporting a threat.
- The domain is marked blacklisted by both VirusTotal and an external blacklist source.
- Historical archive telemetry records 0 snapshots, first seen on 2013-06-15, last seen on 2022-09-26, and 10 years tracked.
- The current registration record lists creation on 2026-06-05 and an age of 0.21 years, creating provenance ambiguity relative to the earlier historical presence without independently proving repurposing.

Regulatory Verification Notes

The available site content does not identify an operating company, provide a licensing authority or registration number, or explain governance, ownership, or any regulated business activity. This is a transparency and verification gap rather than, by itself, proof of fraud; however, it is significant because the domain has no visible business substance against which an operator or service claim could be assessed. The transport layer is valid but provides only basic domain validation and should not be treated as evidence of corporate legitimacy.

EVIDENCE

- The homepage contains no stated legal entity, license, registration number, terms, privacy disclosure, or business contact information.
- The registration record identifies DomainRegistry.com LLC as registrar.
- The site's TLS certificate is issued by YR2 at DV validation level and is valid through 2026-11-03T07:37:05+00:00.
- No matching broker record was returned in the available third-party broker-reputation context; this is contextual only and is not a licensing determination.

What to Verify Next

Before any future interaction surface is introduced, independently establish the operating entity through a corporate registry or other authoritative offline source, and confirm any claimed authorization directly with the relevant regulator. Official support or contact channels should be confirmed through an independently obtained route rather than relying solely on information later published by the domain. Until those checks are complete, account creation, credential submission, and financial activity should not occur.

EVIDENCE

- The homepage has no forms, login mechanism, payment workflow, wallet connection, or external links.
- Behavioral testing recorded no external requests, hidden forms, password submission forms, wallet-provider activity, or clipboard-hijacking behavior across two successful runs.
- The site's available content is limited to 117 characters and contains no operational service description against which authorization could be checked.

Summary Verdict

The overall posture is **critical**, with sensitive interaction risk driven by confirmed external threat findings and unresolved operator identity. The site’s minimal presentation cannot provide sufficient legitimacy context to counter those contradictions.

Infrastructure Integrity

The site resolves directly to one likely origin address rather than through a detected CDN or WAF, and is hosted by EPIK-LLC in the United States. This infrastructure provides no meaningful protective edge layer to mitigate the external reputation risk.

EVIDENCE

- Hosted on AS394456, EPIK-LLC – Epik LLC, US; resolved IP: 66.223.49.89.
- Infrastructure telemetry records one unique IP, zero edge IPs, and one likely origin IP.
- DNS telemetry records a 53-second TTL and the flags `fast\_flux\_like`, `low\_ttl\_noncdn`, and `young\_domain\_low\_footprint`; these are infrastructure indicators, not standalone proof of malicious activity.

Closing Assessment

The domain should be treated as unsuitable for credentials, account access, or financial transactions unless independent identity, security, and authorization checks produce a clear resolution. Passive observation is the proportionate interim posture.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

Analysis engine signal:direct_threat

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of benztechsolutions.com.

- The request stayed on benztechsolutions.com. It was not redirected to another domain. CLEAR
- Registration is published under DomainRegistry.com LLC. CLEAR
- DNS for this domain is served by businessidentity.llc, across 2 name servers. NOTED
- The registration is paid up to 2027-06-05. NOTED
- The earliest public archive of this site is from 2013-06-15. CLEAR
- It is hosted on EPIK-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about benztechsolutions.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
