Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a very small personal landing page for Bernardo Moredo Rocco, presented as a “Página em construção” (“page under construction”) with basic contact details and no visible commercial, transactional, or account-based functionality.

Scam/Impersonation Risk

The principal risk is not the page’s visible business model, which appears personal and non-transactional, but the convergence of external threat detections and a confirmed blacklist result. The site itself contains no login form, payment mechanism, wallet interaction, brand impersonation, or visible monetization, so the page content does not independently demonstrate an active phishing flow; however, those benign surface characteristics do not offset the external reputation evidence. The domain should therefore be treated as unsuitable for credentials, financial activity, downloads, or other sensitive interaction pending independent resolution of the detections. No conflicting legal-entity names were observed, and no on-page brand impersonation was identified.

EVIDENCE

- External reputation telemetry records 11 malicious classifications and 1 suspicious classification, with a confirmed blacklist hit; Google Safe Browsing reported no malicious result.
- The homepage contains approximately 123 characters of visible text and is identified as a personal page under construction, with no forms or transactional elements.
- The domain registration record shows creation on 2020-09-29T00:00:00Z and an age of 5.89 years.
- Archived observations span 2021-11-27T09:56:01Z to 2025-04-05T01:10:34Z, with 5 years tracked; the available archival coverage is limited and does not establish a broader provenance history.

Regulatory Verification Notes

The page presents a personal identity and contact details but does not independently establish the identity of the real-world operator. No financial, brokerage, payment, or other regulated service is visibly offered, and no license claim or regulatory registration number is presented. This is a disclosure and verification gap rather than standalone proof of misconduct. A third-party broker-reputation dataset produced no matching record, which is neutral context and not a licensing determination.

EVIDENCE

- The homepage identifies Bernardo Moredo Rocco and labels the page as under construction.
- No license authority or license number is displayed on the available page.
- The site is served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- The transport certificate is issued by WE1, uses DV validation, and is valid to 2026-10-11T09:44:37+00:00.

What to Verify Next

Before any sensitive interaction, an independent source should confirm that Bernardo Moredo Rocco controls the domain and that the published contact channels are genuine. If the site later presents financial, investment, brokerage, payment, or other regulated services, the relevant regulator's registry should be checked for the exact operator and authorization. Any newly introduced login, download, payment, or data-submission function should undergo a fresh security review rather than being inferred from the current static page.

EVIDENCE

- The current homepage exposes no login form, sensitive form, wallet connection, or payment flow.
- Behavioral testing recorded 2 successful runs, with 0 wallet-connect runs, 0 wallet-sensitive runs, and 0 hidden forms detected.
- The page has no identified internal or external navigation links, so independent confirmation cannot be derived from an on-site link structure.

Summary Verdict

The overall posture is **critical risk**. Although the visible page is a minimal personal landing page rather than an overt transactional scam interface, the confirmed blacklist status and multiple malicious external detections are

decisive contradictions that prevent the website from being treated as trustworthy for sensitive activity. The operator’s real-world identity also remains unverified.

Infrastructure Integrity

Cloudflare provides CDN and WAF protection, and all four observed addresses are Cloudflare edge addresses on AS13335; no origin candidate was observed. This infrastructure reduces direct origin exposure but is only a mitigating technical control and does not resolve the external reputation concerns.

Closing Assessment

Interaction should be limited to passive observation while the external detections, operator identity, and any future functionality are independently resolved; credentials, downloads, payments, and financial activity should not be undertaken through the site.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

About this assessment

A trust score summarises the evidence TrustSniffer could collect about berocco.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
