

Is besancon-self-defense.fr legit? TrustSniffer's high-trust assessment: 100/100

besancon-self-defense.fr

Verdict

100

OUT OF 100

HIGH TRUST

besancon-self-defense.fr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Public-facing website for Besançon Self-Défense (Neurostrike Kapap Krav-Maga). Contains course descriptions, schedules, pricing, instructor credentials, contact info and links to related resources. No signs of financial investment schemes or credential harvesting.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

SELF-DÉFENSE

What besancon-self-defense.fr served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the public website of Besançon Self-Défense, presenting Neurostrike Kapap Krav-Maga training through course information, schedules, pricing, instructor credentials, trial classes, workshops, and contact facilities; its apparent business model is a local self-defense and martial-arts club funded by memberships and paid instruction.

Scam/Impersonation Risk

No contradictions were observed. The site presents an ordinary local-services model rather than an investment, financial, or credential-harvesting operation, and the available page analysis identified no phishing, impersonation, malicious-form, or suspicious behavioral indicators. The apparent legitimacy of the service is supported by substantive course-related content and linked social presence, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage is classified as a local club and course landing page, with no detected login form, hidden form, or sensitive-data submission mechanism.
- Page analysis identified no red flags, no brand-impersonation indicators, and no crypto-related or wallet-connection activity.
- The domain registration record shows creation on 2016-09-08T10:16:40Z and an age of 9.96 years.
- The homepage links to Facebook and YouTube profiles associated with the club's public presence.

Regulatory Verification Notes

The site's apparent legitimacy is evidence-consistent, but its legal and regulatory status should not be treated as independently established. The public content does not present a license claim, licensing authority, or registration number; for a local training service, this is a transparency and applicability question rather than evidence of a scam. The available external reputation checks did not identify malicious activity, and no matching broker-reputation record was found; these are contextual signals, not legal or licensing determinations. The site also has limited formal web-authority and structured metadata, which is consistent with a small local organization but does not establish corporate identity.

EVIDENCE

- The public-facing pages identify the service by the operating name "Besançon Self Défense - Neurostrike Kapap Krav-Maga," without presenting a license number or licensing authority.
- The domain is registered through OVH, with creation date 2016-09-08T10:16:40Z and expiration date 2026-09-08T10:16:40Z.
- Hosting is provided by OVH - OVH SAS, FR, on AS16276.
- The site's TLS certificate is issued by YE1 at DV validation level and is valid through 2026-10-24T00:24:58+00:00.

What to Verify Next

Before a credential or payment interaction, the operator name shown on the site should be matched against an appropriate independent business or association register, where applicable. Course cancellation, refund, and payment-protection terms should be confirmed through the site's legal or commercial information and, for material payments, through the payment provider or an independently obtained contact channel.

EVIDENCE

- The site publishes course pricing, membership information, and contact details relevant to a merchant-identity and payment review.
- The public content provides instructor and course information that can be compared with independently obtained local references.
- The applicable legal or registration status is not specified through a license number or licensing authority on the reviewed pages.

Summary Verdict

The website has a high-trust, low-risk posture and is apparently legitimate on the evidence available. Its established presentation and absence of contradictory threat or impersonation signals support normal browsing and ordinary service evaluation, while the operator’s real-world identity remains not independently verified.

Infrastructure Integrity

The site benefits from CDN/WAF protection, and all observed addresses were associated with edge infrastructure rather than an identified origin candidate. This reduces direct exposure of the underlying service and is a mitigating technical control, not proof of legitimacy.

EVIDENCE

- The infrastructure reports two observed edge addresses: 2001:41d0:301::20 and 46.105.204.20.
- Both observed addresses are associated with AS16276 and the OVH hosting environment in France.
- The site’s transport encryption uses a DV certificate issued by YE1, valid until 2026-10-24T00:24:58+00:00.

Closing Assessment

Ordinary use is proportionate to the available evidence, with independent merchant-identity, cancellation-policy, and payment-protection checks completed before entering credentials or making a material payment.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of besancon-self-defense.fr.

- The request stayed on besancon-self-defense.fr. It was not redirected to another domain. CLEAR
- Registration is published under OVH. CLEAR
- DNS for this domain is served by anycast.me, across 2 name servers. NOTED
- The registration is paid up to 2026-09-08. NOTED
- The earliest public archive of this site is from 2016-10-05. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about besancon-self-defense.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
