

Is bet63xxx.com a scam? TrustSniffer's high-risk assessment: 0/100

bet63xxx.com

Verdict

0

OUT OF 100

CRITICAL RISK

bet63xxx.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Chinese-language gambling site page using bet365 branding and offering login/registration, deposit/payment instructions (including alternative wallet channels), promotional bonuses, app downloads, and notices about withdrawals. Encourages deposits and provides structured payment instructions; legal/licensing claims are present but not verifiable from the page text alone.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What bet63xxx.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Chinese-language online gambling and casino portal presented under the title “365英国上市官网.” It offers sports betting, live casino games, slots, lottery services, account registration and login, promotional bonuses, payment instructions, and application downloads, with the apparent business model of accepting customer deposits and wagers.

Scam/Impersonation Risk

No confirmed blacklist, phishing, impersonation, or conflicting-identity contradiction was observed. Nevertheless, the site presents a material sensitive-interaction risk: the homepage combines login and registration forms with deposit instructions, alternative wallet channels, promotional incentives, and application-download prompts. It also directs users toward payment routes involving 808钱包, 988PAY, and OKPAY, while stating that digital-wallet deposits and withdrawals should be preferred during banking-system maintenance. The page further states that members changing withdrawal credentials may be required to provide a government identity

document and the amount of the last deposit. These mechanics create an opaque value flow and a meaningful risk of credential, identity-document, or funds exposure, particularly because the form analysis identified an untrusted destination and the behavioral review identified suspicious inline scripts. Evidence:

- The homepage contains login, registration, and payment-instruction forms, including a sensitive form associated with an untrusted destination.
- The homepage instructs users to deposit through alternative wallet channels and advertises a deposit bonus of up to 1.5%.
- The homepage requests identity-document and prior-deposit information in connection with withdrawal-password changes.
- Domain registration records show creation on 2024-06-03, an age of 2.21 years, and registration through NameSilo, LLC; historical records contain 28 snapshots spanning 2024–2026.

Regulatory Verification Notes

The site presents legal or licensing-related claims, but the available page text does not provide a licensing authority or license number that can be independently validated. This is a significant regulatory-transparency gap for a gambling operator that accepts deposits. The site's apparent use of bet365 branding should not be treated as proof of affiliation, and the real-world operator remains independently unverified. A valid transport certificate and mainstream hosting arrangement establish technical serviceability, not regulatory authorization or operator legitimacy. Evidence:

- The homepage identifies the service through the title “365英国上市官网” and presents gambling services, but no verifiable licensing authority or license number is available in the supplied page content.
- The site is registered through NameSilo, LLC.
- The site is served from AS13335, Cloudflare, Inc.; its TLS certificate is issued by WE1 at DV validation level and is valid until 2026-10-09.
- No matching broker record was identified in the available third-party reputational dataset.

What to Verify Next

Before any sensitive interaction, an independent check should confirm that the operator named in the applicable terms or legal materials holds a current gambling authorization with the relevant jurisdictional regulator. Payment protections, withdrawal terms, dispute procedures, and the provenance of any downloadable application should also be confirmed through independently sourced channels rather than through the site's own instructions. Credentials used elsewhere should not be reused, and any identity-document request should be validated through a separately confirmed official support route. Evidence:

- The page-level review records five risk indicators, including deposit-before-service, opaque value flow, unverified wallet payments, claim-evidence dissonance, and unverifiable legal status.
- The site advertises application downloads and multiple payment channels from the homepage.
- The identity-verification status remains unverified, with no independent connecting signals supplied.

Summary Verdict

The overall posture is **critical trust risk** for sensitive interactions. The evidence supports treating the website as an unknown gambling operator whose apparent service presentation does not establish a trustworthy real-world identity or a dependable basis for login, credential submission, or financial engagement.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses are CDN edge infrastructure rather than an independently attributable origin. This provides a mitigating layer against direct exposure of the hosting environment, but it does not validate the operator, content, payment flows, or business claims.

Closing Assessment

Prospective users should avoid submitting credentials, identity documents, or funds unless the operator, authorization, payment protections, and application provenance have been independently confirmed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by governance, registration and ownership, page content, behaviour in a sandbox.

01 Governance Risk

- A form asking for sensitive information submits somewhere TrustSniffer could not verify, which caps how far the score can rise.
Governance rule:GOV_SENSITIVE_FORM_UNTRUSTED
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- A form on the page submits to a destination TrustSniffer could not verify.
Page content rule:PAGE_FORM_UNTRUSTED_DEST
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page asks visitors for sensitive information.
Page content rule:PAGE_FORM_SENSITIVE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bet63xxx.com.

- The request stayed on bet63xxx.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-03. NOTED
- The earliest public archive of this site is from 2024-06-03. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bet63xxx.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
