

Is bet73019.com a scam? TrustSniffer's high-risk assessment: 0/100

bet73019.com

Verdict

0

OUT OF 100

CRITICAL RISK

bet73019.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Landing page for an online gambling/sports betting service using bet365 branding and extensive casino/sports content. Promotes alternative wallet payment channels and deposit bonuses; includes login form and instructions for identity verification on password changes. Presents multiple structural risks around deposits and payment handling and shows signs of brand impersonation.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What bet73019.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2025.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is an online gambling and sports-betting landing page presenting live casino, casino, slot, lottery, poker, esports, and sports-betting services under bet365-branded messaging. It invites visitors to register, log in, deposit funds through bank and alternative wallet channels, and participate in betting and gaming activities, with promotional deposit incentives used to attract account funding.

Scam/Impersonation Risk

No confirmed phishing, impersonation, or conflicting legal-identity finding was observed in the supplied evidence. Nevertheless, the homepage uses bet365 branding while operating on a separate domain, creating an unresolved brand-association concern rather than an established impersonation determination. The page combines a login form with an untrusted form destination, deposit-before-service mechanics, opaque payment flows, alternative wallet instructions, and a stated deposit bonus of up to 1.5%. It also instructs users changing account or withdrawal passwords to provide an identity document and the amount of the last deposit. Behavioral

inspection additionally identified two suspicious inline scripts and substantial post-interaction page changes. These converging indicators support a clearly cautionary posture for credentials and financial activity even though external checks did not confirm an active malicious listing.

EVIDENCE

- Registration record: created 2025-04-12T08:02:24Z; domain age 1.36 years.
- Archive record: 4 snapshots spanning 2025–2026, with 2 years tracked.
- Homepage: login, registration, password-reset, and payment-instruction functions are present; the form analysis identifies an untrusted destination.
- Behavioral inspection: 2 suspicious inline scripts, maximum DOM difference of 158 after interaction, and a maximum external-activity ratio of 93.9%.

Regulatory Verification Notes

The available landing-page material does not establish a verifiable operating entity, licensing authority, or license number. This is a material disclosure gap for a gambling and betting service, but it is a regulatory-verification issue rather than proof of fraud. Independent identity verification remains incomplete. The domain is registered through NameSilo, LLC, and the site has valid domain-validated transport encryption; those facts support technical operation but do not validate the operator, gambling authorization, payment arrangements, or use of the bet365 brand. The external reputation picture contains no confirmed malicious result in the supplied checks, although coverage was partial, and the available broker dataset produced no match.

EVIDENCE

- Registration service: NameSilo, LLC; expiration date 2027-04-12T08:02:24Z.
- Hosting record: served on AS140227, HKCICL-AS-AP - Hong Kong Communications International Co., Limited, HK.
- TLS certificate: issued by YR2, validation level DV, valid to 2026-11-11T02:23:30+00:00.
- Homepage disclosure review: no operator name, licensing authority, or license number is supplied in the available site material.

What to Verify Next

Before any sensitive interaction, an independent regulator or licensing-registry search should confirm whether the operator is authorized to provide gambling services in the relevant jurisdiction. The claimed brand relationship should be confirmed through an official corporate channel, not through contact details or instructions presented on the site. Payment recipients, wallet ownership, withdrawal conditions, bonus terms, dispute procedures, and data-handling practices should be validated independently, and any requested identity documentation should be withheld until those checks are completed.

EVIDENCE

- Licensing check: obtain the operator's legal name and license number from an independently verified source, then compare them with the applicable regulator's records.
- Brand check: confirm authorization through the brand owner's separately sourced corporate contact channel.
- Payment check: validate recipient ownership and withdrawal terms through an independent channel before sending funds.
- Account-safety check: treat any request for identity documents or deposit-history information as requiring independent confirmation of necessity and destination.

Summary Verdict

The overall posture is **critical trust risk** with a sensitive-interaction warning. The site may be technically reachable and externally unconfirmed as malicious, but the available evidence does not establish a trustworthy operator identity and shows a convergence of payment, credential, branding, and behavioral concerns. Passive viewing is the only proportionate use supported by the assessment.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge addresses rather than a directly exposed origin. This reduces direct exposure of the hosting system and may help absorb network attacks, but it is only a mitigating technical control and does not authenticate the website or its operator.

Closing Assessment

Interaction should remain limited to passive viewing; credential submission, account creation, deposits, identity-document uploads, and other financial actions should not proceed unless the independent checks above produce satisfactory results.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by governance, registration and ownership, behaviour in a sandbox, page content.

01 Governance Risk

- A form asking for sensitive information submits somewhere TrustSniffer could not verify, which caps how far the score can rise.
Governance rule:GOV_SENSITIVE_FORM_UNTRUSTED
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page asks visitors for sensitive information.
Page content rule:PAGE_FORM_SENSITIVE
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- A form on the page submits to a destination TrustSniffer could not verify.
Page content rule:PAGE_FORM_UNTRUSTED_DEST

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bet73019.com.

- The request stayed on bet73019.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-12. NOTED
- The earliest public archive of this site is from 2025-04-24. CLEAR
- It is hosted on HKCICL-AS-AP, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bet73019.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
