

Is bet73023.com a scam? TrustSniffer's high-risk assessment: 0/100

bet73023.com

Verdict

0

OUT OF 100

CRITICAL RISK

bet73023.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Chinese-language gambling/betting landing page styled as bet365 with login form, deposit/payment instructions (including alternative wallet channels), promotions and app download prompts. Solicits deposits and encourages use of non-bank payment rails; contains claims of licensing/address but presents structural risks around deposit flows and authenticity.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://bet73023.com/

What bet73023.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2025.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a Chinese-language online gambling and betting landing page presenting sports wagering, live casino, slot, lottery, promotional, account-login, deposit, and mobile-app features. Its apparent business model is to attract users to fund gambling accounts through deposits and alternative payment channels, including wallet-based methods.

Scam/Impersonation Risk

The site presents a serious sensitive-interaction risk. Its homepage uses “365” and bet365-style branding, provides a username-and-password login form, solicits deposits before service delivery, promotes alternative wallet channels such as 808 Wallet, 988PAY, and OKPAY, and advertises a top-up promotion of up to 1.5%. It also encourages mobile-app installation and includes withdrawal-related instructions that direct users toward non-bank payment rails. These mechanics create material exposure to credential theft, payment diversion, and loss of deposited funds. External security assessments recorded multiple malicious detections and a confirmed blacklist hit; the site’s technical protections do not offset that reputation signal. No separate conflicting legal-

entity names were established, and the supplied evidence does not classify the bet365-style presentation as a confirmed identity contradiction, but its authenticity remains materially questionable.

EVIDENCE

- The homepage is a Chinese-language gambling landing page titled “365英国上市官网” and contains a sensitive login form requesting usernames, passwords, and CAPTCHA responses.
- The homepage promotes 808 Wallet, 988PAY, and OKPAY for deposits and withdrawals, including a stated top-up incentive of up to 1.5%, and encourages use of digital-wallet channels when bank payments are subject to controls.
- External reputation evidence records 20 malicious detections, 1 suspicious detection, and a confirmed blacklist status.
- Domain registration telemetry: registered 2025-04-12; approximately 1.36 years old.
- Archive telemetry: 0 recorded snapshots; first seen 2025-07-10; last seen 2026-02-11; 2 years tracked.

Regulatory Verification Notes

The homepage makes claims concerning licensing and an address, but the supplied content does not identify a licensing authority or provide a licence number that can be independently checked. This is a material disclosure gap for a gambling service that accepts deposits. The real-world operator identity is not independently verified, so on-site branding and claims should not be treated as proof of ownership or authorisation. The presence of valid transport encryption confirms an encrypted connection only; it does not validate the operator, gambling licence, payment arrangements, or claimed affiliation.

EVIDENCE

- The homepage presents licensing and address claims without supplying a licensing authority or licence number in the captured content.
- The site's transport encryption uses a DV certificate issued by YR1, valid to 2026-11-11.
- The supplied third-party broker-reputation context contains no matching broker record.

What to Verify Next

Before any sensitive interaction, an independent gambling-regulator registry should be used to confirm the operator's legal name, licence status, permitted markets, and approved domain. The claimed affiliation and official support channels should be confirmed through a separately sourced brand or regulator contact route rather than through the site itself. Payment recipients, withdrawal conditions, and any requested identity documents should be validated with the relevant payment provider before funds or documents are transferred. Given the security detections and login surface, credentials should not be entered and deposits or application installations should not proceed while those checks remain unresolved.

EVIDENCE

- The homepage combines account login, deposit instructions, promotional incentives, and app-download prompts.
- The captured form analysis identifies a sensitive form with an untrusted destination.
- The site content identifies alternative payment channels and withdrawal instructions as central account-funding mechanics.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. Available evidence converges on a site whose operational model, authenticity indicators, and external security reputation do not support trust for account access, credential submission, deposits, or other financial activity. The apparent operator identity remains unverified.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed edge addresses 206.119.83.71 and 206.119.83.81 on AS140227; the reported hosting organisation is Hong Kong Communications International Co., Limited, while the infrastructure record places the service in the US. The origin server was not observable. Cloudflare provides a mitigating layer against direct exposure, but it is an infrastructure control rather than evidence that the website or operator is legitimate.

Closing Assessment

Enterprise users and prospective customers should suspend login, payment, document-submission, and app-installation activity unless independent regulatory, brand, and payment-channel checks produce clear, consistent confirmation.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, governance, analysis engine, page content, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- A form asking for sensitive information submits somewhere TrustSniffer could not verify, which caps how far the score can rise.
Governance rule:GOV_SENSITIVE_FORM_UNTRUSTED

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page asks visitors for sensitive information.
Page content rule:PAGE_FORM_SENSITIVE
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- A form on the page submits to a destination TrustSniffer could not verify.
Page content rule:PAGE_FORM_UNTRUSTED_DEST
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bet73023.com.

- The request stayed on bet73023.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-12. NOTED
- The earliest public archive of this site is from 2025-07-10. CLEAR
- It is hosted on HKCICL-AS-AP, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bet73023.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
