

Is bet73044.com a scam? TrustSniffer's high-risk assessment: 0/100

bet73044.com

Verdict

0

OUT OF 100

CRITICAL RISK

bet73044.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Landing page for an online gambling/betting site offering live casino, sports betting, slots and lottery with account login, deposit instructions, and promotional bonuses. The page promotes alternative/unverified wallet payment channels and requests account credentials and deposits.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	17 flagged it VirusTotal	RISK

The page as captured

https://bet73044.com/

What bet73044.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2025.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is an online gambling and betting platform presenting live casino games, sports betting, poker, slots, lottery games, account registration and login, promotional offers, and deposit instructions. Its apparent business model is to attract users, obtain player deposits, and monetize betting and gaming activity.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. External threat intelligence records a confirmed blacklist status, including malicious detections from multiple security providers, while the page requests usernames, passwords, and deposits through a sensitive form whose destination is not trusted. The homepage also promotes alternative payment channels identified as 808 Wallet, 988PAY, and OKPAY, encourages their use to bypass banking controls, and advertises a deposit incentive of up to 1.5%; this creates an opaque value flow before any service outcome is established. The page carries BET365-branded wording and an announcement attributed to a "BET365 Finance Department," but the claimed affiliation is not independently verified. No

separate conflicting legal identities or confirmed brand-impersonation finding is established in the supplied evidence. Evidence:

- External reputation telemetry: 17 malicious and 1 suspicious detections from 23 evaluated results; Fortinet, Kaspersky, and Sophos were among the flagged providers.
- Homepage: login and registration controls request username, password, and captcha credentials.
- Homepage: payment instructions promote 808 Wallet, 988PAY, and OKPAY, including a stated maximum recharge promotion of 1.5%.
- Domain and archive records: registered 2025-04-12; age 1.35 years; 5 historical snapshots spanning 2025-07-11 to 2026-02-05 across 2 years tracked.

Regulatory Verification Notes

The website operates in the gambling and sportsbook sector, where licensing, operator identity, player-fund protections, and dispute arrangements are material. The supplied page evidence does not show a claimed license authority or license number, and the on-page disclosure state is unclear; this is a significant verification gap rather than, by itself, proof of criminal conduct. The operator's real-world identity remains unverified. A valid transport certificate confirms encrypted communication but provides only domain validation and does not establish ownership, licensing, or regulatory authorization. Evidence:

- Hosting telemetry: served through AS140227, HKCICL-AS-AP — Hong Kong Communications International Co., Limited, HK.
- Transport security: TLS certificate issued by YR1, DV validation, valid to 2026-11-11T02:06:30+00:00.
- Legal and identity disclosures: no license authority or license number is identified in the supplied business-model evidence.

What to Verify Next

Before any sensitive interaction, an independent check should identify the legal operator and confirm the relevant gambling license directly with the applicable regulator's registry. Payment instructions should be validated through an independently sourced corporate channel, and any proposed payment beneficiary should be checked against the verified operator rather than relying on instructions displayed on the site. Credential reuse should be avoided, and any suspected exposure should trigger prompt password changes through trusted channels. Evidence:

- Licensing check: confirm the operator name, jurisdiction, license status, and permitted activities in the relevant official registry.
- Payment check: independently confirm beneficiary details and withdrawal terms before authorizing any transfer.
- Contact-channel check: confirm official support and dispute contacts through an independent, offline route.

Summary Verdict

The overall posture is critical, with the available evidence indicating that sensitive interaction is not appropriate. The combination of confirmed external threat detections, high-risk deposit mechanics, and unverified operator identity outweighs the site's basic technical functionality.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present and is a mitigating infrastructure control, but it does not establish legitimacy. Observed visibility is limited to CDN edge infrastructure, preventing independent confirmation of the origin and allowing the underlying content or hosting arrangement to change without direct origin visibility.

Evidence:

- Network telemetry: two observed edge IPs, 206.119.83.71 and 206.119.83.81, both associated with AS140227.
- Infrastructure: Cloudflare is identified as the CDN/WAF provider; likely origin IP count is 0.

Closing Assessment

Prospective users should not submit credentials or funds to the site; any engagement should remain informational unless the operator, authorization, payment arrangements, and recovery mechanisms are independently established.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by governance, registration and ownership, analysis engine, behaviour in a sandbox, page content, external reputation.

01 Governance Risk

- A form asking for sensitive information submits somewhere TrustSniffer could not verify, which caps how far the score can rise.
Governance rule:GOV_SENSITIVE_FORM_UNTRUSTED
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- A form on the page submits to a destination TrustSniffer could not verify.
Page content rule:PAGE_FORM_UNTRUSTED_DEST
- The page asks visitors for sensitive information.
Page content rule:PAGE_FORM_SENSITIVE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bet73044.com.

- The request stayed on bet73044.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-12. NOTED
- The earliest public archive of this site is from 2025-07-11. CLEAR
- It is hosted on HKCICL-AS-AP, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bet73044.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
