Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

bet988.net presents a Portuguese-language online casino aimed at the Brazilian market, offering games, sports-betting content, tournaments, VIP and loyalty features, customer support, and account funding through PIX, cards, and bank transfers. Its apparent business model is to attract users, collect deposits, and monetize betting and casino play.

Scam/Impersonation Risk

The site presents a critical interaction risk. No conflicting legal identities, brand impersonation, or phishing indicators were identified in the supplied page analysis; however, the domain is subject to confirmed blacklist findings from multiple external security sources, including a substantial malicious-detection result. The homepage promotes deposits before service, presents an opaque value flow for funds and winnings, and makes broad claims such as being Brazil's most trusted platform, having more than a decade of experience, and subjecting games to rigorous fairness testing without supplying supporting evidence. These signals materially outweigh the site's professional appearance and stable technical behavior. The page encourages account

creation and deposits for blackjack, live games, tournaments, and related betting activity, creating direct exposure to financial loss and credential risk.

EVIDENCE

- The homepage is classified as an online casino landing page and promotes deposits, bets, payment methods, tournaments, VIP or loyalty programs, and 24/7 support.
- The homepage contains four documented risk indicators: deposit-before-service, opaque value flow, claim-evidence dissonance, and unverifiable legal status.
- External reputation assessment recorded 16 malicious and 2 suspicious detections, with blacklist status confirmed by two external sources.
- The homepage claims more than a decade of market experience and rigorous fairness testing, but the page text contains no supporting audit or testing credentials.

Regulatory Verification Notes

The operator's real-world identity remains unverified, and the site's governance and ownership disclosures are opaque. The page refers to licensing and audits, but no verifiable license authority, registration number, or audit credential is present in the supplied page text. This is a regulatory transparency gap rather than proof of a particular legal violation, but it is significant for a gambling service soliciting deposits from users in Brazil. No match was returned in the supplied broker-reputation context, which provides limited contextual information and does not establish licensing or legality.

EVIDENCE

- Archive records show 270 snapshots spanning 2004–2026, with 23 years tracked; the archive's stated domain-age estimate is 22.157426420260094 years.
- The current registration record lists creation on 2025-10-16T18:03:23Z, an age of 0.84 years, registrar Gname 426 Inc, and expiry on 2026-10-16T18:03:23Z.
- The site is served through AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- The site's TLS certificate uses DV validation, is issued by WE1, and is valid to 2026-10-04T17:59:46+00:00.

What to Verify Next

Before any sensitive interaction, an independent check should establish whether the operator is legally authorized to offer online gambling to the relevant users, whether the named operating entity matches the payment recipient, and whether the stated audits can be confirmed through the issuing organizations. Payment arrangements, withdrawal conditions, dispute handling, age restrictions, responsible-gambling controls, and applicable terms should be reviewed independently rather than relying solely on the site's promotional wording. Official contact channels should also be confirmed through an independent route before any account or payment process is initiated.

EVIDENCE

- The page text provides no verifiable licensing credentials despite referring to licensing and audits.
- The identity-verification status is unverified, with no independent identity signals supplied.
- The business model is explicitly deposit-funded gambling, with financial flows beginning before service delivery.

Summary Verdict

The available evidence supports a critical-risk posture for this website, particularly for account, credential, and financial interactions. The apparent casino business model, unresolved identity and regulatory transparency issues, and confirmed external threat detections prevent the site from being treated as a dependable service.

Infrastructure Integrity

Cloudflare CDN and WAF protection mediate the observed connections, and all observed addresses are CDN edge infrastructure rather than a directly exposed origin. This provides a useful layer of transport and exposure mitigation, but it does not validate the operator, the content, or the site's financial practices.

Closing Assessment

The appropriate disposition is passive review only; account creation, credential submission, and financial transactions should not proceed unless independent legal, operator, payment, and contact-channel checks produce satisfactory results.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bet988.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
