

Is beverlyhillslipodepot.com a scam? TrustSniffer's high-risk assessment: 0/100

beverlyhillslipodepot.com

Verdict

0

OUT OF 100

CRITICAL RISK

beverlyhillslipodepot.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Online store named Beverly Hills Lipo Depot selling low-cost lipo/aspiration tubing and related products. Basic contact email and phone shown but limited legal or regulatory disclosures for medical supplies.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://beverlyhillslipodepot.com/

What beverlyhillslipodepot.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Beverly Hills Lipo Depot is a direct-to-consumer online shop presenting body-sculpting and liposuction-related supplies for purchase through a conventional ecommerce cart, with the apparent business model of selling consumable medical or cosmetic-procedure accessories online.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. Independent security reputation checks recorded a confirmed blacklist status and multiple malicious detections, including detections from Fortinet, Kaspersky, and Sophos; these are materially stronger indicators than the site's ordinary ecommerce presentation or valid transport encryption. The homepage and contact content also provide limited verifiable business context for products associated with medical or cosmetic procedures. No conflicting legal identities or explicit brand-impersonation indicators were identified, but the external threat findings are sufficient to require a security-forward posture. Account login, credential submission, payment activity, and other sensitive interactions should not proceed on the basis of the site's appearance alone.

EVIDENCE

- Homepage: identifies the business as “Beverly Hills Lipo Depot” and offers MicroAire PAL-compatible aspiration tubing, infiltration tubing, flexible aspiration tubing, and double-lumen aspiration tubing through an online cart.
- External reputation telemetry: the domain was recorded as blacklisted, with 17 malicious detections and three tier-one security vendors flagging it.
- Site behavior: hidden forms were detected in both observed interaction runs, despite no visible login form or externally submitted password form.
- Registration and archive telemetry: registered 2023-02-04T18:57:46Z and recorded as approximately 3.54 years old; nine archive snapshots were recorded from 2023-03-03T10:36:55Z through 2025-07-10T00:30:49Z, spanning 3 years.

Regulatory Verification Notes

The site’s apparent business involves products connected with liposuction and body-sculpting procedures, making business identity, product provenance, and applicable medical-supply requirements important verification matters. The supplied page content identifies a shop and provides basic contact details, but does not present a clear legal-entity disclosure, license claim, registration number, or regulatory authority. This is a transparency and verification gap rather than, by itself, proof of fraud. The site’s external threat detections nevertheless materially outweigh its ordinary ecommerce structure. Its registration uses GoDaddy.com, LLC, while the recorded registrant organization is Domains By Proxy, LLC; this is an administrative registration arrangement and does not independently establish the operator’s identity.

EVIDENCE

- Homepage and contact content: describes the store as offering “Safe, High Quality & Affordable, Body Sculpting Products” but supplies limited legal or regulatory information for medical-related merchandise.
- Hosting telemetry: served from AS31898, Oracle Corporation, US.
- TLS telemetry: certificate issued by YR1 at DV validation level, valid to 2026-10-04T15:58:19+00:00.
- Registrar telemetry: GoDaddy.com, LLC; creation date 2023-02-04T18:57:46Z and expiration date 2027-02-04T18:57:46Z.

What to Verify Next

Before any commercial engagement, an independent party should confirm the operator’s legal name, physical business address, product sourcing, and any license or registration applicable to the advertised medical or cosmetic-procedure supplies through authoritative records rather than relying on the website. Payment should use a method offering meaningful dispute and fraud protections, and contact channels should be confirmed through an independently obtained business record. Security teams should also validate the domain’s current reputation and inspect any checkout or account-related behavior in a controlled environment before permitting access from an enterprise network.

EVIDENCE

- Contact page: provides a telephone contact and basic business contact information but no independently corroborated legal-entity record.
- Product pages and cart: offer procedure-related tubing at unusually low displayed prices, requiring confirmation of authenticity, compatibility, and fulfillment terms.
- Checkout workflow: the site exposes cart and checkout functions, creating a payment-exposure point even though no visible login form was identified.
- Threat telemetry: the confirmed blacklist status and malicious detections warrant validation before the domain is allowed for transactional use.

Summary Verdict

The available evidence supports a critical-risk classification for sensitive interaction with this website. Its conventional shop presentation does not offset the convergence of confirmed external threat detections, limited operator verification, and observed hidden forms. The site should be treated as unsuitable for routine login, credential, or financial use.

Infrastructure Integrity

The domain resolves directly to a single likely origin address rather than through a detected CDN edge, and the hosting environment is associated with Oracle Corporation in the United States. A valid DV certificate provides transport encryption, but these infrastructure characteristics are only mitigating technical controls and do not establish site legitimacy or counter the external reputation findings.

EVIDENCE

- Network telemetry: one unique IP and one likely origin IP were identified; no CDN was detected.
- Hosting telemetry: AS31898, Oracle Corporation, US.
- Transport telemetry: DV TLS certificate issued by YR1, valid through 2026-10-04T15:58:19+00:00.

Closing Assessment

Enterprise and prospective customer activity should remain limited to controlled, non-sensitive inspection until the operator, product provenance, regulatory position, and current security reputation have been independently validated. Any later engagement should use strong payment protections and monitoring appropriate to the potential exposure.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The page contained a form a visitor cannot see.

Behaviour in a sandbox rule:BEHAV_HIDDEN_FORMS

- The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of beverlyhillslipodepot.com.

- The request stayed on beverlyhillslipodepot.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by blasterwebservices.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-02-04. [NOTED](#)
- The earliest public archive of this site is from 2023-03-03. [CLEAR](#)
- It is hosted on ORACLE-BMC-31898, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about beverlyhillslipodepot.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
