

Is beyondmenus.com legit? TrustSniffer's high-trust assessment: 100/100

beyondmenus.com

Verdict

100

OUT OF 100

HIGH TRUST

beyondmenus.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Beyond Menu is a long-established Bali-based manufacturer and supplier of bespoke hospitality accessories (menus, folders, room accessories, spa items). The site provides product categories, company history, client references, and forms to request quotes or register to view catalogues.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Beyond Menu is an established Bali-based B2B manufacturer and supplier of bespoke hospitality accessories, presenting menus, room folders, bath and room items, spa accessories, tabletop products, and related operating supplies for hotels, resorts, and restaurants, with an apparent business model centred on custom production, product sales, catalogue access, and quotation requests.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent corporate supplier profile, with no detected phishing, impersonation, malicious-content, or brand-misuse indicators. External reputation checks found no malicious or suspicious detections, no abuse reports, and no broker-dataset match; these are supportive reputational signals rather than proof of operator identity. Interaction testing also found no login form, hidden form, wallet activity, clipboard manipulation, or cloaking. Some browser telemetry showed implementation irregularities, including console errors and DOM changes, but the observed runs completed successfully and the irregularities did not produce a confirmed abuse pattern.

EVIDENCE

- Homepage: no red-flag content, phishing indicators, or suspected brand impersonation were identified.
- External reputation telemetry: 0 malicious detections, 0 suspicious detections, and 0 abuse reports were recorded; coverage was partial.
- Domain registration: registered 2001-05-28 and approximately 25.24 years old.
- Site interaction telemetry: 2 successful runs, 8 console errors, 10 maximum DOM differences after interaction, 0 hidden forms, 0 password forms sent externally, and 0 wallet-provider or wallet-drainer events.

Regulatory Verification Notes

The Our Story, product, catalogue, and contact presentation is consistent with an operating B2B manufacturer rather than a financial or investment service. The site does not present a regulatory licence or licence number, and its on-page legal and corporate disclosure status therefore remains unclear; this is a verification gap, not evidence of deceptive conduct. The available evidence supports an apparently legitimate commercial website, while the real-world operator identity is not independently verified. A separate broker-oriented reputation source returned no match and should be treated only as contextual reputational information.

EVIDENCE

- Domain registration record: registrar identified as Squarespace Domains II LLC; registration expires 2027-05-28.
- Transport security: TLS certificate issued by YR1, validation level DV, valid to 2026-11-07T06:48:31+00:00.
- Homepage and Our Story pages: describe a hospitality-supply and manufacturing business without a regulated-service licence claim or licence number.

What to Verify Next

Before credential or payment interactions, the prospective counterparty should independently confirm the merchant's legal identity and operating details through a reliable offline or separately established business channel. The quotation, delivery, returns, warranty, and payment-protection terms should be obtained in writing, and any catalogue-registration request should be checked for data proportionality. If a transaction involves a regulated activity not apparent from the supplied site content, the relevant regulatory registry should be checked directly.

EVIDENCE

- Contact page: use the quotation and enquiry workflow as the starting point for obtaining written commercial terms and counterparty details.
- Catalogue-registration flow: confirm the information requested and the purpose of access before submitting business data.
- Our Story page: reconcile the presented business identity with independently available merchant records before placing a material order.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated commercial purpose. No scam, phishing, impersonation, or identity-conflict indicators were observed, although the operator’s real-world identity is not independently proven.

Infrastructure Integrity

The site resolves to one identified address associated with CYBERCON - CYBERCON, INC., in the Netherlands, rather than presenting a CDN-fronted edge configuration. This infrastructure provides a clear hosting attribution and does not itself indicate malicious activity; transport encryption is separately confirmed by the site’s valid DV certificate.

EVIDENCE

- Hosting infrastructure: served from AS7393 (CYBERCON - CYBERCON, INC., US), resolved address 213.109.149.171, country NL.
- IP posture: 1 unique IP, 0 edge IPs, and 1 likely origin IP were identified; no CDN was detected.
- Infrastructure resolution: status resolved; registry identified as ripe NCC.

Closing Assessment

Normal browsing and ordinary commercial engagement are proportionate to the high-trust assessment, subject to the standard independent merchant-identity, contractual, and payment-protection checks that should precede material transactions.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	37%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of beyondmenus.com.

- The request stayed on beyondmenus.com. It was not redirected to another domain. CLEAR
- Registration is published under Squarespace Domains II LLC. CLEAR
- DNS for this domain is served by stablehost.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-28. NOTED

- The earliest public archive of this site is from 2002-04-05. CLEAR
- It is hosted on CYBERCON, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about beyondmenus.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
