

Is bgk-group.com legit? TrustSniffer's high-trust assessment: 100/100

bgk-group.com

Verdict

100

OUT OF 100

HIGH TRUST

bgk-group.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Persian-language website for 'Bokhar Gostar Khavar', an industrial manufacturer of boilers, pressure vessels and autoclaves. Contains product listings, company history (established 1372), contact phone numbers and address in Tehran, and links to gallery and catalog downloads.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a Persian-language corporate website for Bokhar Gostar Khavar, an industrial manufacturer presenting boilers, pressure vessels, autoclaves, related thermal equipment, product catalogues, factory imagery, company history, and contact facilities; its apparent business model is B2B equipment sales supported by manufacturing, installation, consultation, and after-sales services.

Scam/Impersonation Risk

No scam, phishing, impersonation, or identity contradictions were observed. The homepage presents a coherent industrial-manufacturing purpose, named products, a company history stating establishment in 1372, a Tehran business address, telephone contact details, catalogue downloads, and gallery content. The site also exposes a standard contact form without a login function, password collection, wallet connection, or sensitive external form destination. Available reputation indicators did not identify blacklist or malicious-site findings, although reputation coverage was not universal.

EVIDENCE

- Homepage: Identifies Bokhar Gostar Khavar as a manufacturer of steam boilers, pressure vessels, hot-water and thermal-oil equipment, boiler-kilns, and industrial autoclaves.
- Homepage and contact page: Present a consistent company name, Tehran address, telephone contact, product catalogue, gallery, and “About Us” navigation.
- Domain registration records: Registered in 2015; approximately 10.82 years old.
- Web-archive record: 73 snapshots spanning 2016–2026, covering 11 tracked years.

Regulatory Verification Notes

The website provides substantive corporate and product information, but the real-world operator identity remains likely rather than independently verified. Its product description states that equipment carries an inspection-quality approval plate and performs beyond applicable standards; these are material commercial and safety claims that should be substantiated independently. No specific licensing authority or license number is presented in the supplied site content, which is a regulatory-disclosure gap rather than evidence of a scam. The domain is registered through Atak Domain, and the transport certificate is valid, providing supporting technical consistency but not legal or regulatory authorization.

EVIDENCE

- Domain registration record: Registrar Atak Domain; creation date 2015-10-27 12:50:32 UTC; registrant recorded as Lemon Group and organization as Nonegar Pardazesh.
- Hosting telemetry: Served from AS48551, Sindad - Sindad Network Technology PJSC, IR.
- TLS telemetry: DV certificate issued by YR1, valid through 2026-10-24 16:09:44 UTC.
- Homepage: Claims inspection-quality approval marking and compliance exceeding stated standards without displaying a license number or licensing authority.

What to Verify Next

Before a credential or payment interaction, an enterprise or buyer should independently confirm the contracting entity against the applicable corporate registry, validate the inspection and standards claims with the relevant quality or safety authority, and obtain written commercial terms covering warranty, installation, after-sales support, delivery, returns, and payment protection. Contact-channel details should also be corroborated through an independent business directory, prior procurement relationship, or offline confirmation rather than relying solely on the website.

EVIDENCE

- About page: Provides the stated corporate history and should be matched to an independently obtained company record.
- Product and catalogue pages: Provide the technical and standards-related claims that require confirmation with the relevant inspection authority.
- Contact page: Provides the business contact route to be corroborated through an independent channel.
- Commercial documentation: Should establish the responsible contracting party, warranty scope, delivery obligations, and payment safeguards.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate industrial-manufacturing website and supports a high-trust, low-risk posture. No contradictory indicators were observed, but the available evidence does not independently prove the real-world operator identity.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed CDN edge servers and a potential origin candidate. This provides a meaningful mitigation against direct origin exposure and common web-layer abuse, while remaining an infrastructure safeguard rather than proof of organizational legitimacy.

Closing Assessment

Ordinary browsing and business enquiry are proportionate; independent entity, commercial-term, and payment-protection checks should be completed before credentials or payments are submitted.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bgk-group.com.

- The request stayed on bgk-group.com. It was not redirected to another domain. CLEAR
- Registration is published under Atak Domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-27. NOTED
- The earliest public archive of this site is from 2016-08-11. CLEAR
- It is hosted on Sindad, from a server in IR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bgk-group.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
