

# Is bgmedia.at legit? TrustSniffer's high-trust assessment: 95/100

bgmedia.at

## Verdict

95

OUT OF 100

HIGH TRUST

bgmedia.at appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

### WHAT THIS SITE APPEARS TO BE

A Bulgarian-language informational portal focused on news, classifieds, events and community information for Bulgarians living in Austria. Contains articles, job listings, event notices and advertising tariffs; appears to be a standard community news site.

## Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

## Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

BGMEDIA.AT is a Bulgarian-language news and community portal serving Bulgarians living in Austria. Its homepage presents local news, information, job and classified listings, community notices, events, business content, and advertising services, indicating a conventional media and community-information model supported by advertising and paid listings.

### Scam/Impersonation Risk

No contradictions were observed: there are no recorded blacklist, phishing, malicious-content, or conflicting-identity indicators. The site's content is coherent with an Austria-focused Bulgarian community publication, and it does not present the login, wallet-connection, investment, or transaction mechanics commonly associated with impersonation or abuse. An automated name-similarity signal involving "media.net" is best treated as a naming similarity rather than an impersonation finding because the homepage content, branding, and business model are materially different. Available evidence is therefore consistent with an established, apparently legitimate website, although the real-world operator identity remains independently unverified.

#### EVIDENCE

- The homepage is classified as a news/community portal and contains Bulgarian-language articles, job notices, events, and community information.
- The homepage has no login form, sensitive form, hidden form, or untrusted form destination.
- Historical continuity for the domain is dated from 2010, with an authoritative age of 15.745 years.
- The domain's historical record contains 173 archive snapshots spanning 2010–2026, covering 17 years.

#### Regulatory Verification Notes

The site appears to operate as a media and community publication rather than as a financial or other regulated service. Its stated commercial activities include advertising, classifieds, and paid political advertising tariffs; the reviewed content does not disclose a regulatory license or registration number, which is a transparency item to clarify if a transaction or legally regulated service is contemplated. Registration data identifies World4You Internet Services GmbH as both registrar and organization, with the registrant recorded as Domain Admin; this supports a documented domain-registration trail but does not independently prove the identity of the publisher. External reputation evidence is favorable: no blacklist or malicious-hosting finding was recorded, and no matching broker-reputation entry was identified.

#### EVIDENCE

- The site's navigation includes News, Information, Classifieds, Events, Business, Contact, and paid political advertising tariffs.
- The domain is registered through World4You Internet Services GmbH; the recorded organization is World4You Internet Services GmbH.
- The site is served through AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- The transport certificate is issued by WE1, uses Domain Validation (DV), and is valid to 2026-10-10 12:07:07 UTC.

#### What to Verify Next

Before any credential or payment interaction, an independent source should confirm the publisher's legal identity and official contact channels. If paid political advertising or another service requiring formal authorization is involved, the applicable Austrian registration or licensing position should be confirmed with the relevant authority. For commercial transactions, ordinary checks of the counterparty, terms, refunds or returns, and payment-protection arrangements should be completed before funds or sensitive information are provided.

#### EVIDENCE

- The Contact page provides the site-designated route for publisher correspondence and identity confirmation.
- The paid political advertising tariff page identifies a commercial service whose contracting entity should be confirmed independently.
- The site presents standard informational content rather than a sensitive account or payment workflow.

### Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate website. The classification is strong, but it should not be interpreted as independent proof of the real-world operator's identity.

### Infrastructure Integrity

Cloudflare CDN and WAF protection are present, and all observed addresses belong to Cloudflare edge infrastructure; the origin server address was not observable in this analysis. This reduces direct origin exposure and is a mitigating infrastructure characteristic, but it is not proof of publisher legitimacy.

### Closing Assessment

Ordinary browsing is proportionate to the assessed posture; any credential or payment interaction should still follow independent identity, service-term, and payment-protection checks before commitment.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

### What the analysis found

No rule findings contributed to this verdict.

### Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

### What TrustSniffer observed

First-party facts recorded during the assessment of bgmedia.at.

- The request stayed on bgmedia.at. It was not redirected to another domain. CLEAR
- Registration is published under World4You Internet Services GmbH ( <https://nic.at/registrar/61> ). CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The earliest public archive of this site is from 2010-11-20. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about bgmedia.at at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
