

Is bharatsilks.com a scam? TrustSniffer's high-risk assessment: 0/100

bharatsilks.com

Verdict

0

OUT OF 100

CRITICAL RISK

bharatsilks.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal 'Under Construction' landing page for bharatsilks with a contact email. No products, forms, or commerce flows are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	4 flagged it VirusTotal	RISK

The page as captured

<https://bharatsilks.com/>

What bharatsilks.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

bharatsilks.com is a minimal “Under Construction” landing page for an apparent online silk or apparel retail brand. It presents a coming-soon message and a contact route, but no products, pricing, checkout, account functions, or other active commercial features are visible.

Scam/Impersonation Risk

No identity contradiction or brand-impersonation signal is evident in the available page content. However, the site is confirmed blacklisted by external sources, with multiple malicious and suspicious detections, including a Tier-1 security-vendor detection; this is a material contradiction that outweighs the otherwise static and non-transactional presentation. The absence of a login form, sensitive form, external submission, or commerce flow means that no credential-harvesting mechanism was observed during the capture, but it does not neutralize the external threat indicators.

EVIDENCE

- External reputation assessment recorded 4 malicious detections and 2 suspicious detections, including one Tier-1 security-vendor detection; two external sources confirmed blacklist status.
- The homepage is a static “Under Construction” page with no login form, sensitive form, product catalogue, pricing, checkout, or payment flow.
- Browser observation recorded no external XHR or POST activity, no hidden forms, no wallet activity, and no clipboard-write behavior.

Regulatory Verification Notes

The available page does not identify a legal operating entity, provide a registration number, or state a licensing basis. This is a disclosure and verification gap rather than an independent finding of fraud, but the operator’s real-world identity remains unverified and the site’s governance disclosures are opaque. The domain itself has substantial registration continuity and uses a known registrar, while valid transport encryption and identifiable hosting provide technical consistency; these signals support infrastructure continuity, not legal legitimacy. No broker match was identified in the supplied third-party reputational context, which is not a licensing determination.

EVIDENCE

- The available homepage contains no corporate identity, licensing statement, registration number, terms, or other legal-entity disclosure.
- Registered in 2000 (~26.3 years old) through PDR Ltd. d/b/a PublicDomainRegistry.com; registration expiry is 2027-05-10.
- Hosted on AS16276 (OVH - OVH SAS, FR).
- TLS certificate issued by YR2 using DV validation, valid to 2026-11-07T02:47:15+00:00.

What to Verify Next

Before any operational engagement, an independent registry or corporate-records check should establish the legal entity behind the brand and confirm that the entity controls the domain. Any claimed retail launch should be checked through independently sourced merchant information, including returns, fulfilment, and payment-protection arrangements. Security teams should also require resolution and re-evaluation of the external blacklist detections before permitting sensitive interaction.

EVIDENCE

- The homepage provides a brand presentation but no independently verifiable legal-entity information.
- No active purchasing or account workflow is available on the captured site, preventing validation of merchant, payment, or fulfilment controls.
- The transport certificate and hosting identity can be compared with independently obtained operator records during domain-control verification.

Summary Verdict

The overall posture is critical, with sensitive interaction risk established by the convergence of confirmed external threat detections, blacklist status, and unverified operator identity. The site should be treated as untrusted for account, credential, payment, or other sensitive activity, notwithstanding its technically stable presentation and long registration continuity.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, and the observed edge address is 51.81.44.182 on AS16276, operated by OVH - OVH SAS, FR; the origin server was not observable in this analysis. This infrastructure provides some exposure mitigation, but it is only a protective technical control and cannot establish legitimacy or offset the external reputation risk.

Closing Assessment

Sensitive interaction should not proceed unless independent operator verification is completed and the external security detections are formally resolved through a fresh assessment.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bharatsilks.com.

- The request stayed on bharatsilks.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by interactivedns.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-10. NOTED
- The earliest public archive of this site is from 2001-09-28. CLEAR
- It is hosted on OVH, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bharatsilks.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
