

Is bhawanigroup.in legit? TrustSniffer's high-trust assessment: 100/100

bhawanigroup.in

Verdict

100

OUT OF 100

HIGH TRUST

bhawanigroup.in appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Official corporate website for a Kolkata-based real-estate developer showcasing projects, contact details, RERA references, testimonials, and enquiry forms. Primary purpose is lead generation and property sales.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Elevating Life & Building Future

What bhawanigroup.in served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents itself as Bhawani Group, a Kolkata-based residential real-estate developer showcasing ongoing, upcoming, and completed housing projects, with property enquiries supporting sales, home-loan assistance, and after-sale services.

Scam/Impersonation Risk

No contradictions were observed. The site's content is consistent with a corporate property-development presence: it provides project information, construction and delivery claims, testimonials, contact routes, and enquiry functionality without presenting phishing, credential-harvesting, crypto, or unusually high-risk financial features. Available external reputation checks returned no malicious or suspicious detections, and no brand-impersonation or phishing indicators were identified. The available evidence supports an apparently legitimate, established site, while independently verifying the real-world operator remains appropriate.

EVIDENCE

- Domain registered on 2017-01-09 and approximately 9.62 years old; registrar: GoDaddy.com, LLC.
- The homepage and enquiry flow contain no login form, hidden sensitive form, password submission, wallet connection, or clipboard-hijacking behavior.
- Available external checks recorded no malicious or suspicious detections, and the broker-reputation dataset produced no match.

Regulatory Verification Notes

The site's projects pages display project-level RERA references, including WBRERA/P/H00/2023/000639, WBRERA/P/NOR/2026/003936, WBRERA/P/NOR/2023/000072, and WBRERA/P/NOR/2023/000041. These references provide useful disclosure substance but are not, by themselves, independent confirmation of the developer's legal identity, project status, or regulatory standing. The site's operator identity is therefore best described as unverified rather than proven. This is a verification and disclosure matter, not evidence of a scam; the overall content, business model, and technical presentation remain consistent with a low-risk corporate website.

EVIDENCE

- The projects page displays RERA identifiers for multiple ongoing developments.
- The site's homepage provides company-oriented sections covering projects, foundation, CSR, media, careers, help desk, and testimonials.
- TLS is valid, uses DV validation, was issued by YE2, and is valid to 2026-11-07.

What to Verify Next

Before any deposit, booking, or transmission of identity or payment information, the prospective counterparty should independently confirm the relevant project registrations through the applicable West Bengal RERA registry and match the registered promoter and project details to the contracting entity. The contracting entity, sale documentation, refund and cancellation terms, bank-account ownership, and payment-protection arrangements should also be checked through independent records rather than relying solely on the website. Official contact channels should be confirmed through an independent route before material transactions.

EVIDENCE

- The appropriate registry control is to compare the project identifiers displayed on the projects page with the applicable regulator's records.
- The site's business model relies on enquiry-led, offline property sales, making contract-party and payment-account matching material controls.
- The site provides a contact and help-desk pathway that can be cross-checked independently before transaction execution.

Summary Verdict

The overall posture is **high trust and low risk**, with strong convergence between the site's corporate content, clean observed security indicators, established registration continuity, and consistent business purpose. The

evidence is consistent with an established, apparently legitimate website, but it does not independently prove the real-world operator's identity.

Infrastructure Integrity

The site resolves through AS-HOSTINGER, operated by Hostinger International Limited, with no CDN edge layer identified and likely origin addresses directly observable in the hosting posture. This is ordinary, identifiable hosting rather than an indication of malicious infrastructure; the transport layer provides an additional mitigating control.

EVIDENCE

- Hosted on AS47583 (AS-HOSTINGER — Hostinger International Limited, CY), with infrastructure registered through RIPE NCC and resolved in Germany.
- The technical posture identified 2 unique IP addresses, 0 edge IP addresses, and 2 likely origin IP addresses.

Closing Assessment

Proceed with ordinary business diligence, particularly independent counterparty, registry, contractual, and payment-protection checks before committing funds or submitting sensitive information.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bhawanigroup.in.

- The request stayed on bhawanigroup.in. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2028-01-09. CLEAR
- The earliest public archive of this site is from 2017-08-16. CLEAR
- It is hosted on AS-HOSTINGER, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bhawanigroup.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
