

Is biddasoft.com legit? TrustSniffer's high-trust assessment: 90/100

biddasoft.com

Verdict

90
OUT OF 100

HIGH TRUST

biddasoft.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 70%.

What this site appears to be

Marketing homepage for Bidda Soft, a digital services agency offering ERP (Odoo) implementations, custom development, UI/UX, AI automation and digital marketing. Includes a contact form to request a free consultation.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Bidda Soft is a corporate digital-services website presenting ERP and Odoo implementation, custom software development, web design and UI/UX, AI automation, digital marketing, branding, and business consulting services, with visitors invited to request a free consultation for prospective project engagements.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent B2B services model rather than financial solicitation, credential collection, cryptocurrency activity, or impersonation of another brand. The available technical and external checks found no malicious, phishing, or blacklist indicators, while the site's long-running, continuous web presence supports provenance consistent with an established business website. This supports an apparently legitimate, low-risk assessment, although it does not independently verify the real-world operator.

EVIDENCE

- Homepage: Describes Bidda Soft as a provider of ERP/Odoo implementation, custom software, UI/UX, AI automation, digital marketing, branding, and consulting services, with no login or payment form identified.
- Domain registration: Registered 2017-01-11 (~9.61 years old) through Namecheap Inc.
- Web archive: 214 snapshots spanning 2017-03-11 to 2025-07-10, covering 9 tracked years with a maximum observed gap of 1 year.
- External reputation observations: No malicious or suspicious result, phishing warning, or blacklist hit was recorded; the observed network was associated with 0 abuse reports.

Regulatory Verification Notes

The site's business presentation is consistent with a conventional digital agency, and no regulated financial or investment service is identified in the supplied page content. The available materials do not independently connect the Bidda Soft name to a verified legal entity, and no licensing claim or registration number was identified; for this type of technology-services engagement, that is a transparency point to clarify rather than evidence of misconduct. A third-party broker-reputation dataset returned no match, which is contextual support only and is not a licensing or regulatory determination.

EVIDENCE

- Homepage: Identifies the service brand as "Bidda Soft" and describes project-based B2B technology and consulting engagements.
- Hosting infrastructure: Served from AS13335 (Cloudflare; CLOUDFLARENET - Cloudflare, Inc., US).
- Site transport encryption: TLS certificate issued by YE1, validation level DV, valid to 2026-10-13 14:07:10 UTC.
- Contact/consultation workflow: The supplied page analysis identifies one lead-capture contact form and no sensitive form destination.

What to Verify Next

Before a commercial engagement, the prospective counterparty should obtain the contracting entity's full legal name, business address, invoicing details, and responsible representative through an independent business channel. The proposed statement of work, ownership of deliverables, support obligations, refund or cancellation terms, and payment-protection arrangements should be documented before funds or credentials are provided. Where the project touches a regulated industry or requires a regulated service, any applicable registration should be checked directly with the relevant authority.

EVIDENCE

- Homepage: The commercial proposition is framed around free consultation followed by contracted digital-services work.
- Service presentation: The site describes multiple technical disciplines, making a written scope, deliverables, and responsibility allocation material to due diligence.
- Identity materials: The supplied site content establishes a service brand and offering but does not independently verify the contracting legal entity.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or other contradictory signal was observed, but the operator's real-world identity remains independently unverified.

Infrastructure Integrity

Cloudflare CDN and WAF protection fronts the site, and all observed addresses were CDN edge addresses rather than identified origin infrastructure. This is a mitigating exposure-control measure, not proof of the operator's legitimacy.

Closing Assessment

Ordinary commercial due diligence should precede credential or payment interactions, with particular attention to independently confirming the counterparty, contractual terms, and available payment protections.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of biddasoft.com.

- The request stayed on biddasoft.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-11. NOTED

- The earliest public archive of this site is from 2017-03-11. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about biddasoft.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
