

Is biforst.com a scam? TrustSniffer's high-risk assessment: 0/100

biforst.com

Verdict

0

OUT OF 100

CRITICAL RISK

biforst.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate website for Biforst Group, a Malaysia-founded logistics company (3PL/4PL) offering transportation, fleet solutions, MRO, logistics software and related services; contains news, events, career/E-login and contact/location information.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://www.biforst.com/index.html>

What biforst.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Biforst.com presents itself as the corporate website of Biforst Group, a Malaysia-founded business-to-business logistics provider offering transportation, fleet solutions, maintenance and repair services, logistics software, company information, careers, and contact facilities.

Scam/Impersonation Risk

The site's corporate presentation is internally consistent with a logistics business and the page analysis identified no explicit brand-impersonation, phishing, cryptocurrency, or malicious form behavior. However, this benign presentation is outweighed by confirmed external threat detections and blacklist status from multiple sources, including six malicious detections and a Fortinet threat flag. The presence of an E-login form on a site with this reputation materially increases the risk associated with credential submission, even though the form was not observed sending passwords to an untrusted destination. The available evidence therefore supports a clearly cautionary assessment for sensitive interaction, while not establishing that the logistics business itself is fraudulent or that the site is impersonating another named entity.

EVIDENCE

- The homepage identifies Biforst Group as a logistics company providing transportation, fleet, MRO, and logistics-software services.
- External reputation checks recorded 6 malicious detections and a Fortinet threat flag; the domain was also confirmed on external blacklists.
- The homepage contains one E-login form; behavioral testing recorded no hidden forms, no external password submissions, and no wallet or clipboard-drainer activity.
- Domain registration evidence records creation on 2004-03-01 and an age of 22.48 years; the registrar is ENOM, INC.

Regulatory Verification Notes

The website describes a corporate logistics and software-services business rather than a financial service, and no broker-dataset match was identified. Its available content does not present a licensing claim, licensing authority, or registration number; this is a verification and disclosure gap rather than, by itself, evidence of a scam. The real-world operator identity remains unverified, so the company description should be treated as an on-site representation rather than independent proof of legal ownership or authorization.

EVIDENCE

- The homepage and business-content pages describe 3PL/4PL logistics, transportation, fleet services, MRO, and TechWorld logistics software.
- No license authority or license number is identified in the available site content.
- The site's TLS certificate is OV-validated, issued by GeoTrust TLS RSA CA G1, identifies BIFORST LOGISTICS SDN. BHD., and is valid until 2027-02-16.
- The site is hosted through Exa Bytes Network Sdn. Bhd. in Malaysia on AS46015.

What to Verify Next

Before any login or exchange of sensitive information, the prospective counterparty should independently confirm that the domain is an authorized Biforst Group channel through a telephone number or business contact obtained from an unrelated, trusted source. The legal entity named in contracts, invoices, recruitment correspondence, or service proposals should be checked against the relevant Malaysian corporate registry, and any claimed operating permits or sector authorizations should be confirmed with the applicable authority. Credentials should not be reused, and payment instructions should be validated through an independently established channel.

EVIDENCE

- The site provides corporate contact, location, careers, and E-login functions that can be compared against independently sourced company records.
- The on-site business model is commercial logistics and software services, with no identified licensing disclosure to authenticate.
- The certificate subject identifies BIFORST LOGISTICS SDN. BHD., providing a specific entity name for independent corporate-record comparison.

Summary Verdict

The overall posture is **critical risk for sensitive interaction**. A coherent corporate presentation and stable technical operation do not overcome the confirmed external threat detections and blacklist findings. The site's apparent business legitimacy remains insufficiently reliable for credentials, confidential information, or financial activity.

Infrastructure Integrity

The site resolves directly to a single apparent origin address rather than a trusted CDN or WAF edge, and no CDN protection was detected. Hosting on Exa Bytes Network Sdn. Bhd. provides a technically identifiable service path, but infrastructure identification and transport encryption are mitigating technical observations only and do not offset the external reputation risk.

EVIDENCE

- Resolved infrastructure: 1 unique IP, 0 edge IPs, and 1 likely origin IP; CDN absent.
- Hosting infrastructure is AS46015, Exa Bytes Network Sdn. Bhd., Malaysia.
- Transport encryption uses an OV certificate issued by GeoTrust TLS RSA CA G1, valid to 2027-02-16.

Closing Assessment

Sensitive actions should be withheld unless the domain, operating entity, contact channels, and transaction instructions have been independently authenticated; read-only review is the proportionate immediate posture.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of biforst.com.

- The request stayed on biforst.com. It was not redirected to another domain. CLEAR
- Registration is published under ENOM, INC.. CLEAR
- DNS for this domain is served by mschosting.com, across 3 name servers. NOTED
- The registration is paid up to 2029-03-01. CLEAR
- The earliest public archive of this site is from 2004-08-13. CLEAR
- It is hosted on EXABYTES-AS-AP, from a server in MY. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about biforst.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
