## Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

This is a digital marketing agency website presenting SEO, pay-per-click advertising, social media, email marketing, web development, case studies, testimonials, pricing, and contact options; its apparent business model is to sell marketing services and client engagements to businesses.

### Scam/Impersonation Risk

No contradictions were observed. The site presents a conventional agency profile rather than a financial, cryptocurrency, or other abuse-prone service, and the available page analysis identified no phishing, impersonation, malicious behavior, or content red flags. A login element appears within the WordPress site structure, but the observed contact and login forms did not show an untrusted destination or sensitive-form behavior. The available external reputation checks did not identify malicious or suspicious results, although reputation coverage was not complete.

#### EVIDENCE

- The homepage identifies “Big Mountain Marketing” and presents Local SEO, search-engine optimization, PPC management, social-media marketing, email marketing, and web-development services.
- The domain was registered on 2017-05-05 and is approximately 9.3 years old.
- Archived records span 2018-08-08 through 2026-03-11, representing 9 years tracked; archival capture is sparse, but no suspicious repurposing or semantic category shift was identified.
- The homepage and contact interface returned stable page content, with no detected cloaking, wallet activity, external form posts, clipboard manipulation, or malicious scripts.

#### Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate agency website, but the real-world operator identity is not independently verified. The site describes commercial marketing services and does not present a regulated financial or investment offering; consequently, a financial license would not ordinarily be expected from the business description. The supplied content does not clearly establish a legal entity, registration number, or other independently verifiable corporate identifier. The contact area also retains generic Seosight theme material, including placeholder-style text and a Melbourne address and telephone presentation, which reduces the evidentiary value of the on-page identity claims without constituting an identity contradiction. Registration privacy through PERFECT PRIVACY, LLC is an administrative limitation rather than evidence of misconduct. No matching third-party broker profile was identified.

#### EVIDENCE

- The domain registrar is Launchpad.com Inc.; the recorded registration expires on 2027-05-05.
- The site's transport encryption uses a DV certificate issued by YR2, valid through 2026-10-31T06:36:31+00:00.
- Hosting resolves through AS32475, identified as SINGLEHOP-LLC - Internap Holding LLC, US.
- The homepage, Services, Our Agency, Testimonials, Pricing Packages, and Contacts areas provide substantive business content but do not clearly state a legal entity or licensing/registration identifier.

#### What to Verify Next

Before credential or payment interactions, an independent check should confirm the operating business name and service-provider identity through an offline or separately sourced contact route. Any proposed engagement should also be supported by a written statement of work, identifiable contracting party, applicable cancellation or refund terms, and payment protections appropriate to the transaction. If the engagement involves a jurisdiction-specific regulated service, the relevant registry should be checked directly rather than relying on website statements.

## EVIDENCE

- The Services and Pricing areas define the commercial scope and should be matched against the contracting party named in any proposal or invoice.
- The Contacts and Our Agency areas are the appropriate pages for reconciling the published business identity and contact details with independently obtained information.
- The site's contact and login forms are present without an observed untrusted submission destination, but their legitimacy still depends on confirming the official channels independently.

## Summary Verdict

The overall posture is **high trust and low risk**, and the evidence is consistent with an established, apparently legitimate website. The conclusion reflects strong convergence across the site's substantive business content, long operating history, stable technical behavior, and absence of identified contradiction signals, while preserving uncertainty about the operator's independent real-world identity.

## Infrastructure Integrity

The site uses a conventional direct-hosting posture with one resolved address and no detected CDN or WAF edge layer; the observed address is therefore likely the hosting origin. This is an infrastructure characteristic, not an indication of maliciousness, and the site's stable delivery and valid transport encryption provide appropriate baseline protection for ordinary web interaction.

## Closing Assessment

Normal browsing and routine agency enquiries are proportionate to the assessed posture; credentials or payments should follow ordinary independent checks of the contracting party, service terms, and available payment protection.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

No rule findings contributed to this verdict.

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of bigmtnmarketing.com.

- The request stayed on bigmtnmarketing.com. It was not redirected to another domain. [CLEAR](#)

- Registration is published under Launchpad.com Inc.. CLEAR
- DNS for this domain is served by dnsnetservice.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-05. NOTED
- The earliest public archive of this site is from 2018-08-08. CLEAR
- It is hosted on SINGLEHOP-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bigmtnmarketing.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
