Full analysis

Overview

BIGO LIVE is a multilingual live-streaming and social-engagement platform offering live broadcasts, gaming streams, chat and community features, user login, digital recharge and gifting, advertising, and related partnerships.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents consistent BIGO LIVE branding, a coherent live-streaming and social-platform business model, standard legal links, and no detected phishing, impersonation, or malicious-content indicators. External reputation checks were clean, supporting an apparently legitimate and established site; however, the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage is branded “BIGO LIVE” and provides live-stream, gaming, login, recharge, and gifting functions alongside community policies.
- The domain was registered on 2016-02-17 and is approximately 10.49 years old.
- Historical records contain 76 snapshots from 2017-08-25 through 2026-05-17, covering 10 tracked years.
- External checks recorded 0 malicious and 0 suspicious detections, with no phishing or blacklist hit.

Regulatory Verification Notes

The site provides prominent Agreement, Privacy Policy, Child Safety, Anti-bullying, Cookie, Law Enforcement Request, Copyright, Code of Conduct, Community Guidelines, Transparency Report, and Accessibility pages. The homepage identifies the apparent operator through a copyright notice for BIGO Technology Pte. Ltd.; this is an on-site attribution rather than independent proof of the legal operator. No specific regulatory licence or registration number is presented in the supplied site material, so the relevant regulatory status should be confirmed according to the jurisdiction and any payment-related activity involved. The absence of a broker-dataset match is contextual reputational information, not a licensing determination.

EVIDENCE

- The homepage links to the Agreement, Privacy Policy, Child Safety, Community Guidelines, and Transparency Report pages.
- The homepage copyright notice states “Copyright © 2015-2026 Bigo Technology Pte. Ltd.”
- The site is served from AS10122, NETSTAR-AS-AP - NETSTAR (SG) PTE. LTD., SG.
- Transport encryption uses a GlobalSign GCC R6 AlphaSSL CA 2025 certificate with DV validation, valid through 2026-12-17.

What to Verify Next

Before credential or payment interactions, independently confirm that the intended service is the official BIGO LIVE service and that any applicable merchant, consumer-protection, or platform obligations are satisfied in the relevant jurisdiction. Review the applicable user agreement, privacy, child-safety, refund, and payment-protection terms, and validate support or account-recovery channels through independently sourced official references rather than relying solely on an on-page contact route.

EVIDENCE

- The captured homepage contains a scan-to-login prompt and does not expose a sensitive password form in the observed page.
- The site publishes dedicated policy pages covering user conduct, child safety, privacy, cookies, accessibility, and law-enforcement requests.
- Official social links are presented for Facebook, Twitter, Instagram, and YouTube.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. The classification supports ordinary use, while the operator’s real-world identity should remain treated as likely rather than proven.

Infrastructure Integrity

The site resolves to two likely origin IP addresses, with no CDN or edge IP identified in the observed infrastructure. The hosting resolution is stable and attributable to an identified provider, but the infrastructure posture should be treated as a technical mitigating context rather than proof of legitimacy.

Closing Assessment

Ordinary browsing and platform use are proportionate to the assessment; credentials or payments should follow independent confirmation of the official service, applicable terms, and available payment protections.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bigolive.tv at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
