Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

BIG Telecom is a telecommunications provider presenting internet, digital television, telephony, video surveillance, and IP-VPN services for businesses, operators, developers, property managers, and individual customers, with an apparent subscription and service-contract business model.

Scam/Impersonation Risk

No contradictions were observed. The site's corporate-service presentation, defined customer groups, service catalogue, contact route, account area, licensing section, and service rules form a coherent identity, while the supplied technical and behavioral checks found no phishing, impersonation, malicious, or hidden-form indicators.

- The homepage identifies BIG Telecom's business and consumer connectivity services and customer segments.
- The homepage provides "Личный кабинет," customer support, contact information, and service categories without detected sensitive forms or untrusted destinations.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.
- The domain was registered on 2002-03-18 and is approximately 24.39 years old through 2027-03-18.

Regulatory Verification Notes

The site provides dedicated "Licenses" and "Rules for Communications Services" pages, indicating an effort to present service-governance material. The supplied evidence does not establish a verified license number or regulator-confirmed authorization, so licensing remains a targeted transparency item rather than an indication of misconduct. No broker-dataset match was identified.

- The homepage links to licensing material and detailed communications-service rules.
- Hosted on AS35810 (BIGTELECOM-AS – Big Telecom JSC, RU).
- TLS certificate issued by YR2 with DV validation, valid to 2026-10-15.
- The site is ranked 96139 globally and remains within the top one million domains.

What to Verify Next

Before entering a material service commitment, confirm the applicable communications authorization and the contractual service terms through the relevant official registry and the site's published legal pages. Independent

confirmation of the organization's official contact channels is also appropriate for high-value engagements.

- The site publishes licensing and communications-service rules as dedicated navigation items.
- The business model is subscription- and service-contract-based across business and consumer offerings.
- The site's transport encryption is currently valid through 2026-10-15.

Summary Verdict

The website presents as a legitimate, established, and trustworthy telecommunications provider with a coherent operating model and no observed scam or impersonation contradictions. Normal interaction, including account login and standard service use, is appropriate.

Infrastructure Integrity

The site resolves directly to one likely origin address and is hosted by Big Telecom JSC on AS35810 in Russia, without a detected CDN or WAF layer. The valid TLS certificate provides transport protection, while the direct hosting arrangement should be understood as an infrastructure characteristic rather than a legitimacy guarantee.

Closing Assessment

Prospective customers and business counterparties may proceed with normal service engagement, subject to routine confirmation of contractual and authorization details for material commitments.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bigtelecom.ru.

- The request stayed on bigtelecom.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGRU-RU. CLEAR
- DNS for this domain is served by 118.2, across 2 name servers. NOTED
- The registration is paid up to 2027-03-18. NOTED
- It is hosted on BIGTELECOM-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bigtelecom.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
