

Is biogasunite.org legit? TrustSniffer's high-trust assessment: 100/100

biogasunite.org

Verdict

100

OUT OF 100

HIGH TRUST

biogasunite.org appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 70%.

What this site appears to be

BiogasUnite is a Pan-African platform focused on repairing and maintaining household biogas systems, connecting technicians, logistics and investors to restore trust in biogas technology and scale clean cooking solutions. The site provides informational content, partner references, contact email and calls to join or request services.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2022.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

BiogasUnite is a Pan-African platform focused on repairing and maintaining household biogas systems, connecting system owners with technicians, logistics providers, and investors to support reliable clean-cooking infrastructure. The site presents informational material, impact and footprint content, partner-oriented engagement, and requests for repair or service assistance.

Scam/Impersonation Risk

No contradictions were observed. The site's stated purpose, informational presentation, repair-service call to action, and references to clean-cooking challenges are consistent across the available content, with no detected phishing, impersonation, malicious behavior, or deceptive financial-product pattern. Its apparent legitimacy is further supported by a multi-year registration record, continuous historical presence, stable observed behavior, and clean external reputation signals; however, the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage describes biogas maintenance, technician coordination, logistics, funding, and repair requests without presenting a deceptive investment or credential-harvesting mechanism.
- The domain was registered in 2022 and is approximately 4.43 years old.
- Historical records contain 235 snapshots spanning 2022–2026, with 5 years tracked and no suspicious repurposing identified.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, 0 abuse reports, and no blacklist or phishing indication.

Regulatory Verification Notes

The available pages present BiogasUnite as an informational or development-oriented service platform and include a privacy policy, partner references, and links to Facebook and LinkedIn. No license, registration number, or clearly identified legal entity is disclosed in the supplied page content; this is a transparency and applicability question rather than evidence of a scam, particularly because the site does not present itself as a regulated financial provider. The available evidence is consistent with an established, apparently legitimate website, but it does not independently prove the operator's legal identity or regulatory status.

EVIDENCE

- The homepage and navigation identify sections for “Our Footprint,” “Biogas Benefits,” “Solutions,” “Investors & Events,” “Get in Touch,” and “Privacy Policy.”
- The site's registration record identifies united-domains GmbH as registrar, with registration dated 2022-03-17 and expiration dated 2027-03-17.
- Hosting is identified as AS24940, HETZNER-AS – Hetzner Online GmbH, DE; the TLS certificate was issued by YE1 at DV validation level and is valid to 2026-10-02.
- The site links to Facebook and LinkedIn and contains partner-oriented outreach, but the supplied pages do not independently establish a legal entity or license.

What to Verify Next

Before credential or payment interactions, an interested party should independently confirm which legal entity operates the platform, whether any registration or sector-specific authorization applies to the proposed service, and whether referenced partners recognize the relationship. Service terms, refund or return arrangements where relevant, and payment-protection mechanisms should also be confirmed through independently sourced contact channels rather than relying solely on site-provided claims.

EVIDENCE

- The homepage directs visitors toward repair requests and partnership or investor engagement, making service scope and counterparties relevant to confirm.
- The privacy-policy and contact areas provide the appropriate starting points for reviewing data handling and service communications.
- The Facebook and LinkedIn references provide additional channels for checking continuity of the organization's public presence.

Summary Verdict

The overall posture is high trust and low risk, with evidence consistent with an established, apparently legitimate site and no observed scam or impersonation contradictions. The principal limitation is that the available evidence supports, but does not prove, the connection between the website and a specific real-world operator.

Infrastructure Integrity

A CDN/WAF protective layer is present. The analysis observed the edge address 5.75.155.22 and identified no origin-server candidate; this reduces direct origin exposure but remains a mitigating infrastructure characteristic rather than proof of legitimacy.

Closing Assessment

Normal informational engagement is proportionate, while independent merchant-identity, service-policy, and payment-protection checks should be completed before credentials or payments are submitted.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of biogasunite.org.

- The request stayed on biogasunite.org. It was not redirected to another domain. CLEAR
- Registration is published under united-domains GmbH. CLEAR
- DNS for this domain is served by udag.org, across 3 name servers. NOTED
- The registration is paid up to 2027-03-17. NOTED
- The earliest public archive of this site is from 2022-09-27. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about biogasunite.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
