

Is biomed.fi legit? TrustSniffer's high-trust assessment: 80/100

biomed.fi

Verdict

80

OUT OF 100

HIGH TRUST

biomed.fi appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 70%.

What this site appears to be

Finnish online health product store (Biomed) pages detailing cookie consent, third-party trackers and integrations (Klarna, Google, Hotjar, social pixels). Appears to be a standard ecommerce site with analytics and marketing cookies; no explicit phishing or crypto-investment content found.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Biomed.fi is a Finnish-language online health and wellness retail store presenting products for sale through a conventional ecommerce model with shopping, checkout, payment, customer-support, and privacy functions.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, brand-impersonation, malicious-content, or crypto-investment indicators. The site's behavioral activity included a hidden form and significant post-interaction page changes, but no password-external form, wallet activity, clipboard hijacking, or cloaking was detected; in context, these are implementation and tracking-related anomalies rather than evidence of impersonation. Available reputation checks recorded no malicious or suspicious findings, and no matching broker warning was identified.

EVIDENCE

- The homepage and checkout analysis found no login form, phishing indicators, or untrusted form destination.
- The behavioral assessment recorded hidden-form activity and DOM changes but no password-external forms, wallet-sensitive activity, wallet-drainer activity, or cloaking.
- The domain was registered on 2001-03-20 and is approximately 25.44 years old.
- The site has 274 archive snapshots spanning 2001–2026, with 26 years tracked.

Regulatory Verification Notes

The available material is consistent with an established ecommerce operation, but the real-world operator identity is not independently verified. The domain registration record identifies Biomed Oy and uses Gandi SAS as registrar, which supports apparent continuity without proving that the current website operator is the same entity. The supplied site material does not show a licensing claim or registration number; for a health-product retailer, the applicability of any sector-specific authorization should therefore be assessed rather than assumed. The cookie-consent and privacy material describes analytics, advertising, social-media, payment, and customer-support integrations, indicating ordinary commercial disclosures but not constituting regulatory validation.

EVIDENCE

- The domain registration record lists Biomed Oy as the registrant and Gandi SAS as registrar.
- The site is served from AS24940, HETZNER-AS — Hetzner Online GmbH, DE.
- Transport encryption uses a DV certificate issued by YE2, valid to 2026-09-27T03:11:27+00:00.
- The privacy-policy and cookie-consent pages provide data-use disclosures but do not present a license or registration number in the supplied content.

What to Verify Next

Before credential or payment interactions, an independent merchant-identity check should confirm that Biomed Oy is the operating entity and that its contact details correspond with authoritative business records. The applicable Finnish consumer-protection, health-product, and ecommerce requirements should be checked with the relevant official registry or authority where appropriate. The terms, returns, delivery, warranty, privacy, and payment-protection provisions should be reviewed on the site, and official support channels should be confirmed through an independent route before a material transaction.

EVIDENCE

- The site exposes shop, cart, checkout, and privacy-policy paths, providing the principal pages for transaction and disclosure review.
- The checkout uses a payment-integration surface, making processor identity, buyer protection, refund handling, and chargeback arrangements relevant verification points.
- The site publishes cookie-consent content describing necessary, preference, statistics, and marketing processing categories.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture with no observed scam or impersonation contradiction. The classification is favorable, while the operator's real-world identity remains likely rather than independently proven.

Infrastructure Integrity

The website benefits from a CDN/WAF-protected delivery path, which limits direct exposure of the service infrastructure and is a mitigating security control rather than proof of legitimacy. Hosting is associated with Hetzner Online GmbH in Germany, and the observed origin server was not exposed during this analysis.

Closing Assessment

Routine browsing is proportionate, but independent merchant-identity, return-policy, and payment-protection checks should precede credential submission or payment commitment.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of biomed.fi.

- The request stayed on biomed.fi. It was not redirected to another domain. CLEAR
- Registration is published under Gandi SAS. CLEAR
- DNS for this domain is served by gandi.net, across 3 name servers. NOTED
- The registration is paid up to 2027-08-31. NOTED
- The earliest public archive of this site is from 2001-04-18. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about biomed.fi at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
