Full analysis

Overview

Bio Quantum Solutions is a South African alternative-wellness practice presenting frequency-based assessments and non-invasive therapies, including Bioplasm NLS, SCIO, BioARC Rife, and Solfeggio frequency tuning, with the apparent purpose of selling personalized wellness sessions.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting-identity signals were observed. The homepage does, however, make high-stakes claims through testimonials about detecting and treating serious conditions, including cancer-related issues, without presenting supporting clinical evidence; its medical disclaimer does not resolve that evidence gap. This is a content-quality concern rather than evidence of deceptive identity.

EVIDENCE

- The homepage identifies Bio Quantum Solutions and describes frequency-based wellness services and practitioner experience.
- The homepage contains testimonials referring to serious-condition detection and treatment, alongside a statement that the services do not replace medical care.
- Domain registration: 2011-06-30; approximately 15.1 years old.
- Web archives record 395 snapshots across 12 tracked years, from 2015-07-03 through 2026-06-06.

Regulatory Verification Notes

The site presents a local wellness business and publishes contact and service information, but the supplied pages do not state a professional license, registration number, or licensing authority. That is a transparency item for regulatory verification, not an identity contradiction. External reputation checks found no malicious or suspicious detections, and no broker-related match was identified.

EVIDENCE

- The homepage describes one-on-one wellness assessments and non-invasive therapy sessions.
- The homepage does not provide a licensing authority or registration number.
- The domain is registered through 1-Grid to Micro Fusion Computers.
- TLS uses issuer YR2 with DV validation and is valid through 2026-10-30.

What to Verify Next

For any clinical or health-related decision, independently confirm the practitioner’s applicable South African credentials and whether the advertised services require professional registration. Confirm the official business and support channels through an independently sourced contact route before relying on treatment-related representations.

EVIDENCE

- The homepage makes health-related diagnostic and treatment representations.
- The homepage provides a medical disclaimer but no supplied licensing details.
- The site's contact pathway is presented as a standard review/contact interaction without a sensitive credential form.

Summary Verdict

Bio Quantum Solutions presents as a legitimate, established website with a clean technical and reputational posture and no observed impersonation or phishing contradictions. Its principal limitation is the evidentiary quality of health-related claims, which warrants professional-context review without changing the site’s overall trusted status.

Infrastructure Integrity

The site resolves directly to one likely origin address rather than through a detected CDN or WAF. Hosting is provided by Wifi-Resources (Pty) Ltd in South Africa on AS328036; this is a neutral infrastructure characteristic, while the valid transport encryption provides a basic protective control.

Closing Assessment

Normal website interaction, including account access where applicable and standard use, is appropriate; health-related claims should be assessed alongside independently verified professional guidance.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bioquantum.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
