Full analysis

Overview

What is presented is the Bio Ritmo premium fitness website, a commercial marketing platform for a Brazilian gym chain offering memberships, class schedules, wellness programs, premium facilities, and a companion mobile application.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent Bio Ritmo fitness offering, with no detected phishing indicators, sensitive login form, brand-impersonation signal, or malicious external reputation finding. The domain’s long registration continuity and sustained archival presence further support an established web identity, although the real-world operator remains independently unverified. The available evidence therefore supports an apparently legitimate, low-risk commercial website rather than a scam or impersonation site.

EVIDENCE

- Homepage: “Bio Ritmo | Academia Premium” branding, membership prompts, class information, fitness programs, and premium-facility content are internally consistent with the stated gym business model.
- Homepage behavior: no login form, hidden form, password submission, wallet activity, cloaking, clipboard activity, or sensitive external form was detected.
- Domain registration: registered 1998-06-04; age 28.21 years.
- Web archive: 893 snapshots spanning 1999-04-28 to 2026-07-08, covering 28 years tracked.

Regulatory Verification Notes

The site is a commercial fitness service rather than a site presenting itself as a regulated financial provider. Its homepage includes corporate and legal footer content, but the supplied page evidence does not show a licensing authority or registration number. That is a disclosure and merchant-identity verification point, not evidence of fraud. The available reputation context contains no matching broker warning, while the site’s established content, domain continuity, and clean technical reputation are consistent with a mature commercial presence.

EVIDENCE

- Homepage footer: corporate/legal information is present alongside membership and application prompts.
- Homepage content: the business model is commercial fitness, with revenue described through memberships, classes, and related services rather than financial products.
- Transport encryption: TLS uses issuer "Amazon RSA 2048 M01," validation level DV, valid to 2026-12-22T23:59:59+00:00.
- Layer 1 hosting telemetry: served from AS16509, AMAZON-02 - Amazon.com, Inc., US.

What to Verify Next

Before credential or payment interactions, independently confirm the merchant entity associated with the intended Bio Ritmo facility, review membership duration, cancellation, refund, and renewal terms, and confirm that any payment page and mobile application are the official channels. For a regulated enterprise onboarding process, retain copies of the applicable legal terms and validate the contracting entity through an independent business or offline contact route.

EVIDENCE

- Homepage: membership enrolment calls to action indicate that commercial terms and payment handling may follow the marketing journey.
- Homepage content map: membership signups, class schedules, training-app download prompts, and legal information are identified as the principal interaction areas.
- Forms analysis: no sensitive form or untrusted destination was detected on the captured homepage.

Summary Verdict

The available evidence is consistent with an established, apparently legitimate website supporting a low-risk commercial fitness business. Its clean reputation, coherent page content, long-running domain presence, and technically valid service support a high-trust posture, while independent operator identity verification remains incomplete.

Infrastructure Integrity

The website is protected by Amazon Web Services CDN/WAF infrastructure. Observed addresses were CDN edge servers on AS14618 operated by Amazon-AES - Amazon.com, Inc., US; no origin candidate was identified in the infrastructure analysis. This protection helps mitigate direct exposure and abuse opportunities but is a security control, not proof of business legitimacy.

Closing Assessment

Ordinary use is proportionate to the assessed posture, subject to standard independent checks of the contracting merchant, membership terms, and payment protections before committing credentials or funds.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bioritmo.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
